Bespoke timber joinery

PDS

M MASONITE. & **PREMDOR**® a beautiful history
Manufacturing excellence comes from years of experience.

As one of the UK's leading door manufacturers, Premdor is proud to provide the industry with one of the most extensive timber door collections in the country.

A division of the revolutionary Masonite organisation, Premdor has designed and produced pioneering joinery solutions for nearly 25 years, resulting in a reputation for innovation, quality and reliability.

Premdor's customer service ethos is firmly rooted in providing customers with quality products in good time and in good condition, whilst providing help and support at every turn. With a sound understanding of the industry, Premdor recognises that time is often of the essence and consequently, many of our products are available in popular sizes on a reduced leadtime, all delivered via a well-known and timely transport service.

As a responsible manufacturer, Premdor is wholly committed to a rigorous environmental management programme and in addition, has been independently accredited to meet the requirements of BS EN ISO 14001. Premdor also embraces the principles of the Forest Stewardship Council® (FSC®) and the PEFC's chain of custody schemes.

That's the Premdor Way...

Interior flush doors

portfolio

With veneers hand crafted in Italy and finished doors manufactured in the UK. Portfolio doors are designed to bring more original ideas, more personality as well as more innovative tones, textures and moods to interior spaces.

In partnership with **ALPI**

Innova®

Innova® doors are faced with panel effect veneers inlaid with real wood in a one panel design. Inlays are as follows: White oak is inlaid with Bubinga and Ash inlaid with American Walnut. Door faces are fully finished with a hard wearing lacquer to give a smooth, wipe clean surface.

Veneer

Natural wood veneers offer a luxury appearance from a cost effective flush door specification.

Veneer range door faces are fully face lacquered in clear satin finish. Vertical door edges feature timber lippings to complement the choice of either dark or light hardwood. Core options include certified fire doors.

High Pressure Laminate

The High Pressure Laminate range offers excellent versatility and produces a range of impact and scratch resistant doors suitable for a range of high-traffic environments.

Flush Glazed Fire Doors

A number of different apertured and glazed fire door options are available on applicable flush styles featured on pages 15 to 64. With many different designs available, including popular options on a reduced lead time, the range adheres to both Parts B and M of the Building Regulations.

Let More Originality In.

Portfolio brings together cutting edge Veneer Match technology and an unrivalled collection of stylish finishes.

All our unique doors are created by engineering **real veneers** into a **consistent grain** and **consistent colour** that still allows for natural variation within the doors. Each one has its own individual personality, ensuring that they are **never identical**.

With a solid core as standard and beautifully showcasing real Ash or Oak veneers inlaid with contrasting American Walnut or Bubinga in an on-trend 1 panel design, the Innova range is the premium choice for modern homes and apartment buildings.

- The luxury appearance of our Innova® doors enhances both commercial decor and home living environments.
- Simple hardwood inlays highlight the cross grained stile and rail features and the aesthetic quality of this door.
- Inlaid real wood panel designs: Ash inlaid with American Walnut; White oak inlaid with Bubinga.
- Fully face lacquered and timber edge lipped stiles.
- Veneers are natural products and variations will occur.
- Not suitable for door pairs due to potential alignment issues.
- Option Plus and factory servicing is available, see page 176 for details.

Available for 35mm doors only

Interior high pressure laminate (HPL)

Premdor's full high pressure laminate door range combines superior durability and strength with excellent impact and scratch resistance – perfect for busy environments, such as hotels, communal areas and offices. Manufactured on a made to order basis with a solid core as standard, doors are available as singles or pairs, with or without apertures. 30 minute fire doors are framed as standard, 60 minute un-framed fire doors are also available.

Why use HPL:

- Excellent impact and scratch resistance.
- Superior durability and strength.
- Exceptional reproduction qualities, especially for woodgrain effects, creating an appearance that is close to perfection.
- Functional and hygienic in everyday use.

Available in 80 standard colours with additional options available on request, below is a selection of the most popular finishes. Other Polyurea and Formica decors are available upon request.

* - Supplied with oak effect lippings # - Supplied with walnut effect lippings

Interior flush glazed fire doors

Glazed fire door options are available on all styles featured on pages 15 to 63. With many different designs available, including popular options (16G and 18G clear glazed) in Ash and White Oak on a reduced lead time. Appropriate styles adhere to both Part B and M of the Building Regulations.

- Glass is available in fire rated clear wired, clear or obscure.
- For non-stocked designs, price and availability on application.
- FD60 options available, price and availability on application.
- 19G, 20G, 25G and 29G are not available in the FD60 Firemaster range.

4 Easy Steps to select, price and order your door.

- Choose door & door size**
Select your choice of door size from pages 15-63.
- Locate door code and price**
Using your chosen door size and veneer type select the product code and price from the tables on pages 15-63.
E.g. Koto veneer, 762x1981x44mm FD30 - Code 29411 £150.00
- Choose glazing design option**
Select a glazing option from the designs shown below, e.g. 16G.
- Choose glass type and calculate price**
From the table below, choose the type of glass required, find the corresponding price and add to the price of the door.
E.g. 16G FD30 wired glass = £240.00 plus £150.00 (cost of door) = £390.00 in total.

KEY

- *Add price of glazing to price of required door.
- ¥ 50R design recommended for domestic use only.
- * Available on Portfolio range only.
- ‡ Side margin variable according to door width.
- # Top margin variable depending on the height of the door.
- § Not available in doors less than 762mm wide.
- ¹ 610-686mm widths.
- ² 726-926mm widths.

- Fireshield FD30 fire rated.
- Firemaster FD60 fire rated.

The BWF-CERTIFIRE Fire Door Scheme was established to improve the standard of fire doors across the supply chain. The scheme is operated and managed by the British Woodworking Federation (BWF).

Fire doors purchased from manufacturers who are members of the scheme means:

- Products will fulfil the demand for certified fire doors
- All fire doors are part of the market leading 3rd party accreditation scheme

Why choose products with third party accreditation?

Manufacturers often make claims that their products are tested and achieve a certain performance level. But did the products pass that test? And if so, then how do they prove it?

It is important for a manufacturer to demonstrate that the products they make are consistently 'fit for purpose' and that passing the fire test wasn't a one-off event.

Third-party certification tests and verifies a fire door's design, performance, manufacturing process and quality assurance from manufacture to the point of installation.

The company is independently audited to ensure that all manufacturing processes and manufacturing control systems are in place to ensure consistent performance with the product that was fire tested.

The product is subjected to regular scrutiny, with frequent testing taking place on standard products to ensure that passing the test wasn't just a once-only event.

Make sure your fire doors are safe and you fulfil your responsibilities by only using third-party certificated and accredited fire doors and compatible components.

All Premdor Moulded, Veneer, Laminate and Paint grade internal fire doors are all BWF-Certifire accredited.

Look out for **BWF-CERTIFIRE** on all certfire doors

The BWF-CERTIFIRE Fire Door and Doorset Scheme, established by the fire door manufacturing industry, aims to promote the importance of using third party certificated fire doors as vital component of any passive fire plan. The scheme offers clear and simple methods of tracing a fire door back through all stages of manufacture to ensure the quality of manufacture and maintain the certification. It also acts to bring together fire door manufacturers, their suppliers, door converters,

merchants and installers to work in an alliance across the supply chain.

The whole purpose of the scheme is to give confidence in the quality and performance of fire doors to specifiers, enforcement authorities, building owners and occupiers.

The scheme's certification partner audits, tests and verifies a fire doors design, performance, manufacturing process and the associated procedures, quality assurance,

and the audit trail from manufacture to installation.

FD30 glazed fire doors available

Traditional Oak

The traditional oak selection has all the majestic properties expected of oak doors.

All doors exploit raised and fielded or flat recessed panels to add stunning definition, in an array of designs. Available unfinished or pre-finished with a high-performance three-coat system, FD30 fire doors and glazed options complete this range.

Shaker Oak

Available in an on-trend 1930's design or a conventional 4 panel option, the shaker oak range perfectly complements both modern and traditional interiors. Incorporating three enlightening glazed options, the range includes FD30 fire doors. All shaker oak doors are supplied unfinished for staining or painting to the desired colour.

Contemporary Oak

Premdor's contemporary oak range now includes an expanded range of styles and sizes, including two factory glazed fire door options. Faced with real oak veneers and incorporating a robust solid core, some doors within this range are available either unfinished or pre-finished.

Interior croft solid oak

Croft solid

Croft solid clear glazed

Croft solid clear glazed 3/4 light / FD30 glazed

The ever-popular croft design is now available in three alluring options, including two glazed styles. With intricately grooved solid panels and a robust construction, this classic door is a winning choice for any home.

- Solid construction combining high-quality interior-grade chipboard with hardwood lippings on all four sides.
- Two glazed designs available – a traditional 6 light version or a 3/4 light option including a single pane of 4mm thick clear toughened glass with frit print detailed lines.
- Designs incorporate real American White Oak veneers.
- Available either unfinished or in some options pre-finished with a 3-part polyurethane coating for lasting protection.
- Solid FD30 fire door option available.
- Factory glazed FD30 fire doors available in Croft solid clear glazed 3/4 light with 7mm laminated fire rated safety glass and frit print detailed lines.
- Veneers are natural products and variations will occur especially when used as a door pair.
- PEFC chain of custody.

Premium Moulded Panel

Premdor's premium moulded range is an exquisite collection of finely detailed moulded panel doors. Available in an array of styles, the range also includes an expanded selection of glazed options, including 3 and 4 light horizontal styles, offset glazed panels and leaded and frit-print glazed designs.

Traditional Moulded

The traditional moulded panel door is a firm favourite amongst homeowners, due, in part, to paintable, white base-coated faces and excellent performance properties. Now including affordable glazed options in a number of beloved panel designs, the range encompasses a wide choice of sizes and core constructions.

Glazed Canadian Range

The Canadian range features individual bevelled glass pieces within chrome effect glazing bars, making this range a stunning alternative to conventional glazed interior doors.

Glazed Manhattan Range

Bold and impressive, the Manhattan range will add style to any home. Manhattan doors have plant on decorative lead effect on the glass, supplied in a choice of either satin white or chrome effect.

Glazed Moulded Range

A range of glazed moulded doors to suit all pockets. Available with clear or obscure glass in textured or smooth finishes.

Paint Grade

The Popular paint grade door is ideal for basic applications, offering a timber veneered face surface ready for preparation, site priming and paint decoration. Popular paint grade doors are available with PEFC chain of custody as standard. Paint grade plus with its factory pre-primed surface completes this comprehensive offer.

Pair makers

Code	Description	Price
61569	White primed pair maker	£65.00
61570	Oak pair maker	£80.00

Available for 35mm doors only

OPTION PLUS

FACTORY SUPPLIED

Options can be ordered on all doors where suitable.

- Non standard sizes
- Factory priming (face only)
- Supply and fit intumescent seals to Fire doors

Please see page 176 for further information.

- Fireshield FD30 fire rated.
- Firemaster FD60 fire rated.

FSC® – applies to Standard Core and Firemaster ranges.

PEFC – applies to Semi Solid, Safe 'N' Sound and Fireshield ranges.

View our internal ladder solid oak alternatives on page 86.

Ideal as an upper or lower floor alternative.

Premium 1 panel moulded

The 1 panel moulded option perfectly complements on-trend minimalistic interiors and modern homes. Embodying intricate fine lines on a smooth white surface, the superb 1 panel is also available in four glazed designs, including the 4 light option.

- Quality moulded panel facings.
- White base coated faces.
- Smooth faces suitable for paint finishing.
- Now available in a range of Semi Solid and Safe 'N' Sound core options.
- 1 panel leaded clear glazed available in white or chrome.
- Clear glass toughened to BS EN 12600 and tested to BS EN 12150 (non fire doors only).
- Option Plus factory servicing is available, see page 176 for details.
- FD30 Fire doors can now be trimmed by up to 10mm on the two long edges and bottom of the door. Making fitting simpler and more flexible for the installer.

OPTION
FACTORY SUPPLIED PLUS

Options can be ordered on all doors where suitable.

- Non standard sizes
 - Factory priming (face only)
 - Supply and fit intumescent seals to Fire doors
- Please see page 176 for further information.
- Fireshield FD30 fire rated.
 - Firemaster FD60 fire rated.

FSC® – applies to Standard Core and Firemaster ranges.
PEFC – applies to Semi Solid, Safe 'N' Sound and Fireshield ranges.

1 panel moulded provides an ideal blank canvas. Consider adding mirrors or vinyls to personalise your doors.

Shallow moulding detail

Premium horizontal 4 line moulded

Encompassing four smooth lines neatly stacked in a stylish horizontal pattern, the inimitable Horizontal 4 line design is perfect for modern homes and interiors. With smooth panel faces, this door allows for further customisation, utilising vinyl or bold decorative designs.

- White base coated faces.
- Smooth faces suitable for paint finishing.
- Clear glass toughened to BS EN 12600 and tested to BS EN 12150 (non fire doors only).
- Not suitable for door pairs due to potential alignment issues.
- Option Plus factory servicing is available, see page 176 for details.
- FD30 Fire doors can now be trimmed by up to 10mm on the two long edges and bottom of the door. Making fitting simpler and more flexible for the installer.

OPTION
FACTORY SUPPLIED

Options can be ordered on all doors where suitable.

- Non standard sizes
- Factory priming (face only)
- Supply and fit intumescent seals to Fire doors

Please see page 176 for further information.

- Fireshield FD30 fire rated.
- Firemaster FD60 fire rated.

FSC® - applies to Standard Core and Firemaster ranges.
PEFC - applies to Semi Solid, Safe 'N' Sound and Fireshield ranges.

Horizontal 4 line moulded provides an ideal blank canvas. Consider adding mirrors or vinyls to personalise your doors.

Moulding detail

Premium vertical 5 panel moulded

Premium vertical 5 panel

Premium vertical 5 panel 1 light clear etched glazed

Now one of the UK's best-selling door designs, the Vertical 5 panel design incorporates intricate vertical lines in a panel moulded design. With high-quality textured faces, this astounding door provides the look and feel of a traditional timber door.

- Quality moulded panel facings.
- White base coated faces.
- Textured faces suitable for painting.
- Various core weight options available.
- Mobility and fire door options.
- Glazed option available. Suitable for domestic use only.
- Clear glass with etched lines, toughened to BS EN 12600 (non fire doors only).
- Option Plus factory servicing is available, see page 176 for details.
- FD30 Fire doors can now be trimmed by up to 10mm on the two long edges and bottom of the door. Making fitting simpler and more flexible for the installer.
- Premium vertical 5 panel now available in 533 x 1981mm across all core options upon request.

OPTION PLUS
FACTORY SUPPLIED

Options can be ordered on all doors where suitable.

- Non standard sizes
- Factory priming (face only)
- White factory paint finishing (face only)
- Supply and fit intumescent seals to Fire doors

Please see page 176 for further information.

- Fireshield FD30 fire rated.
- Firemaster FD60 fire rated.

OPTION

Options can be ordered on all doors where suitable.

- Non standard sizes
- Factory priming (face only) excludes bi-folds
- White factory paint finishing (textured door faces only) excludes bi-folds
- Supply and fit intumescent seals to Fire doors

Please see page 176 for further information.

■ Fireshield FD30 fire rated.

■ Firemaster FD60 fire rated.

² Two panels only.

See Diagram.

⁴ Four panel smooth 533mm (1'9") doors are supplied as four panel design, with restricted stile width. See diagram.

Combining a traditional look with unparalleled performance properties, the enticing 4 panel moulded is available in either a delectably smooth finish or a realistic wood-grain texture with the four bold panels providing prominence to any room within the home.

- Quality moulded panel facings.
- White base coated faces.
- 4 panel textured and smooth faces suitable for painting.
- Complementary glazed options available, see pages 106 -111.
- Various core weight options available.
- Option Plus factory servicing is available, see page 176 for details.
- FD30 Fire doors can now be trimmed by up to 10mm on the two long edges and bottom of the door. Making fitting simpler and more flexible for the installer.

FSC® – applies to Standard Core and Firemaster ranges.

PEFC – applies to Semi Solid Core, Safe 'N' Sound and Fireshield ranges.

Interior 5 panel smooth moulded

5 panel smooth

5 panel smooth
3/4 light clear glazed

5 panel smooth
5 light clear glazed

Effortlessly uniting a smooth as silk finish and five well-defined panels in a vertical design, this 5 panel smooth door is already a favourite amongst homeowners. Seamlessly adding character and sophistication to the home, this door is also available as a fire door and with two new glazed options.

- Quality moulded panel facings.
- White base coated faces.
- Smooth faces suitable for paint finishing.
- Clear glazed versions available
- Option plus factory servicing is available, see page 176 for details.
- Glazed options suitable for domestic use only.

Interior 6 panel moulded

6 panel
smooth / textured

6 panel bi-fold
smooth / textured

Found in many modern homes, the 6 panel moulded door is a timeless classic and allows homeowners to attain the traditional look and feel of a timber door at a competitive price. Available in smooth or textured finishes, the 6 panel is offered in a breadth of core options.

- Quality moulded panel facings.
- White base coated faces.
- Textured and smooth faces suitable for painting.
- Complementary glazed options available, see pages 106 -111.
- Various core weight options available.
- Option Plus factory servicing is available, see page 176 for details.
- FD30 Fire doors can now be trimmed by up to 10mm on the two long edges and bottom of the door. Making fitting simpler and more flexible for the installer.

Chrome effect
glazing bar

The Canadian glazed collection encompasses a sophisticated range of elegantly designed doors, all supplied with individual clear bevelled glass panels. Available in four refined designs, each door harnesses its own individual style, providing natural light and an original finish to any home.

- Chrome effect glazing bar construction creates the six or ten light design.
- Individual clear bevelled glass panels toughened to BS EN 12600.
- Paper wrapped MDF or timber glazing cassette (at our option).
- When hanging pairs, ensure glass bevel is on the same side on both doors.
- Quality smooth or textured moulded panel facings.
- White base coated faces.
- Option Plus factory servicing is available, see page 176 for details.
- Pair maker available allowing for the creation of a door pair with any 35mm internal door.

Manhattan glazed

Manhattan half light clear glazed

Manhattan 6 light clear glazed

Manhattan 6 light arch top clear glazed

Manhattan full light clear glazed

Manhattan 10 light clear glazed

Manhattan 10 light arch top clear glazed

Manhattan 15 light clear glazed

When a modern glazed moulded door is required, look no further than the effortlessly stylish Manhattan range. Allowing natural light into the home to illuminate bleaker rooms, the Manhattan range is available with decorative chrome or white-effect leading on all square-top designs and white leading on arch-top styles.

- Single pane glazing with paper wrapped MDF or timber glazing cassette (at our option).
- Glazing bar effect created using white or chrome effect decorative leading.
- Clear glass toughened to BS EN 12600.
- Textured or smooth moulded panel facings.
- White base coated faces.
- Option Plus factory servicing is available, see page 176 for details.

All fireshield FD30 and firemaster FD60 fire doors are third party certified within the BWF Certifire Scheme. This means that every fire door is monitored and recorded throughout the production process, to arrive with the end user fully performance rated.

An important feature of the scheme is the unique BWF Certifire label. Designed to be tamper proof, this enables the door to be identified easily once installed. In addition, detailed information is supplied with each door, to assist installation.

Apertures should not be cut in fire doors on site. By doing so performance in a fire situation can become seriously impaired, and the original door certification is invalidated.

Premdor moulded skin fireshield FD30 and firemaster FD60 fire doors are compliant with British Standard testing and supported under audit by the BWF/Certifire accreditation scheme. This scope of approval includes glazed designs.

Fireshield doors are glazed to ensure performance integrity in a fire situation. Unglazed fire doors are not available.

To ensure your family and home is protected in the unfortunate case of a fire, select from Premdor's BWF-Certifire approved range of factory fabricated and fully-glazed fire doors. Available in FD30 and FD60 specifications, BWF-Certifire approval ensures all the necessary requirements of the building regulations are met *. For pricing and availability, please contact our sales centre.

- Door designs shown are available in Safe 'N' Sound core construction and FD30 fire doors.
- FD60 fire doors available for M4M, M6M & M4G designs.
- Glazed FD30 fire doors are supplied with clear unwired fire rated glass fitted as standard. Wired option also available.
- Obscure glass option available on Safe 'N' Sound doors only.
- Other glazing styles available upon request.
- Primed timber glazing cassette, or bead (foil wrapped MDF).
- Textured or smooth moulded panel facings.
- White base coated faces.

* Fire door performance is only guaranteed if the overall fire doorset assembly is correctly installed and maintained throughout the product's lifecycle.

OPTION Plus

FACTORY SUPPLIED

Options can be ordered on all doors where suitable.

- Non standard sizes
- Factory priming (face only)
- White factory paint finishing (textured face only)

- Supply and fit intumescent seals to Fire doors

Please see page 176 for further information.

Please note that these options may not be available with some moulded panel

door sizes, due to technical limitations.

Fireshield doors are only available glazed to ensure performance integrity in a fire situation. Prices available on application.

Interior flush paint grade plus

PAINTGRADE PLUS
ENVIRONMENTALLY FRIENDLY PREMIUM FINISH

Paint grade plus

Lipped paint grade plus

When a timely and cost-effective door installation is required, Premdor's Paint Grade Plus range is just the answer. Dense and smooth door faces are factory pre-primed for easy on-site finishing, reducing decoration time and site cost. An alternative version with un-primed lipped edges is also available, but will require on-site preparation and finishing.

- Where a simple or minimalistic door appearance is required or necessary, a trouble-free paint grade flush product remains the popular choice.
- Paint grade plus offers real value and a cost effective solution where the contract budget or time is tight.
- Full PEFC chain of custody certification is standard making this door ideal for when contractual environmental statutes or compliance exists. Excludes Firemaster doors.
- Smooth, high density faces ensure that paint grade plus doors have the optimum base for a high quality painted finish.
- Doors are available in a lipped or un-lipped specification.
- FD30 doors up to 2400mm high available upon request.

OPTION
FACTORY SUPPLIED

Options can be ordered on all doors where suitable. Please see page 176 for further information.

- Non standard sizes.
- Supply and fit intumescent seals to Fire doors.
- Fireshield FD30 fire rated.
- Firemaster FD60 fire rated.

PEFC – applies to Standard core, ExtraCore and Fireshield doors.

Interior flush glazed paint grade fire doors

A variety of glazing options are available with all Paint grade doors in FD30 Fireshield and FD60 Firemaster specifications, with popular styles and sizes available on a reduced lead time. Appropriate styles adhere to both Part B and Part M of the Building Regulations, perfect for communal areas where mobility may be a consideration. For FD60 pricing please contact the sales office on 0844 209 0008.

4 Easy Steps to select, price and order your door.

1 Choose door size

Select your choice of door size from page 114.

2 Locate fire door code and price

Using your chosen door size select the product code and price from the tables on pages 114.

E.g. Popular paint grade, 914x1981x44mm FD30 - Code 22155 £110.00

3 Choose glazing design option

Select a glazing option from the designs shown above, e.g. 16G. Wired.

4 Choose glass type and calculate price

From the table above, choose the type of glass required, find the corresponding price and add to the price of the door.

E.g. 16G FD30 wired glass = £240.00 plus £110.00 (cost of door) = £350.00 in total.

KEY

*Add price of glazing to price of required door.

¥ 50R design recommended for domestic use only.

* Available on Portfolio range only.

‡ Side margin variable according to door width.

Top margin variable depending on the height of the door.

§ Not available in doors less than 762mm wide.

¹ 610-686mm widths.

² 726-926mm widths.

■ Fireshield FD30 fire rated.

■ Firemaster FD60 fire rated.

■ Part M Mobility

DorFab introduction

A range of innovative doorsets, designed for internal use, flexible living and apartment entrances.

122

126

SpeedSet Plus is a cost effective way of fitting an internal door and frame without traditional costly joinery skills. This unique doorset can be easily adjusted by +/- 10mm to accommodate variations within a given wall thickness.

- ✓ Factory pre-assembled doorsets*
- ✓ Unique frame adjustment
- ✓ Installed in approximately 20 minutes
- ✓ Pre-mitred architrave
- ✓ Concealed fixings
- ✓ No joinery skills required
- ✓ Save time, reduce cost

* Applies to single leaf doorsets only

For those looking for something special in a commercial or public environment, solid rebated doorsets (SRB) is a complete internal fire doorset and ironmongery package tailored to suit all types of establishments.

- ✓ Timber frame factory pre-assembled doorsets*
- ✓ Solid rebated timber frame
- ✓ Available as pairs
- ✓ Large selection of fire rated doors
- ✓ Saves time
- ✓ Reduce costs

* Applies to single leaf doorsets only

SOUNDSECURE

FD30 & FD60 SECURED BY DESIGN INTERNAL APARTMENT ENTRANCE DOORSETS

When an attractive apartment entrance doorset is required with outstanding fire, security and sound reduction properties, SoundSecure doorsets offer a readily available solution to the complex performance demands of apartment entrances.

- ✓ Pre-assembled flat entrance doorsets
- ✓ Secured by Design
- ✓ Available in FD30S and FD60S core options
- ✓ 3 point espagnolette locking system
- ✓ Timber frame
- ✓ Compliant with building regulations
- ✓ Be safe, be secure

Full details are shown in our SpeedSet Plus and SoundSecure doorset literature. Please call 0844 209 0008 and request your copy or download from www.premdor.co.uk

SpeedSet plus - internal doorset system

Adjustable internal pre-hung doorset allowing easy modification for variation within a given wall thickness.

The perfect solution for imperfect walls

Width adjustable SpeedSet Plus can quickly and easily be adjusted by +/- 10mm to take up variation in wall thickness. Except 77mm wide lining which only adjusts in the plus direction and 300mm which adjust in the minus direction only.

The smart way to...

- ✓ Save time
- ✓ Reduce cost
- ✓ Ensure quality

Why is SpeedSet Plus unique

SpeedSet Plus has the ability to adjust the width of the lining by +/- 10mm to allow for variation in wall thickness (with the exception of the 77mm and 300mm linings).

SpeedSet Plus is available for use with wall widths from 77mm and up to 300mm.

Minimal tools required and no trained joinery skills required.

Rapid installation: doorsets can be installed in approximately 20 minutes.

Quick reference guide to your kit components

DOOR

- SpeedSet Plus can be supplied with all door options shown of pages 124-125.
- FD30 fire doors and door pairs available. (Pairs supplied unassembled for ease of transportation and handling).

ARCHITRAVE

- Supplied pre-mitred.
- Supplied cut to length.
- Various styles available.

IRONMONGERY

- Factory pre-fitted CE Marked latch/lock options.
- Door handles are sold separately.

LINING

- White re-coatable foil faced 25mm moisture resistant MDF linings.
- Adjustable linings.
- +/- 10mm adjustment with the exception of the 77mm lining = +10mm and 300mm lining = -10mm only.
- Lining widths, 77,90,95,100,115,125, 133,150 to 300mm.
- Minimal site decoration.

HINGES

- Pre-hung on three adjustable hinges.
- Allows adjustment to stop gap.
- Optional Class 13 CE Marked ball bearing hinges available on 44mm doors.

DOOR STOP

- 12mm factory fitted door stop as standard.

FIXING PACK

- Components and step by step fixing instructions.
- All screws are plated to eliminate rust.

DELIVERY

SpeedSet Plus can be delivered in plot lots as required by your build programme. Individual doorsets are packaged and braced for safe transportation and storage.

SpeedSet plus – options

Door designs and finishes

SpeedSet Plus doorsets are available in all designs featured below in a variety of core constructions complete with all necessary components apart from the handles.

Available in Semi Solid or Safe 'N' Sound at our option.

Available in Safe 'N' Sound and FD30 fire door options.

Available in 35mm Solid core and FD30 fire doors options excluding Oak & Ash 16G which are FD30 only.

Available in Standard core and FD30 fire door options. White oak also available in solid core.

Available in Standard core and FD30 fire door options, Imperial 40mm thick doors are available in popular paint grade only.

Ironmongery options

N.B - Door handles are not provided.

65mm Latch
CE Marked chrome effect

Bath Lock
CE Marked chrome effect

Five Lever Sash Lock
Chrome effect
(Euro cylinder lock and fire brigade lock available)

Roller Catch
Chrome effect
(applies to door pairs only, not available on FD30 fire doors)

Shootbolt (optional)
Chrome effect (applies to door pairs only)

Adjustable Hinge
Chrome effect (standard) or optional White

Ball Bearing Hinge, Class 13 CE Marked
Chrome effect or Silver
(optional 44mm FD30 doors only)

Available in Standard Core, Semi Solid, Safe 'N' Sound and FD30 fire door options, excluding 5 panel smooth which is available in standard core and FD30 only.

Available in Solid core and FD30 fire door options.

Available in Solid core and FD30 fire door options.

Available in FD30 fire doors only.

Architrave types

Architraves are supplied unassembled, but cut to length, pre-mitred and machined for 'butterfly' joining clips to connect the components together. Final installation on site is completed by gluing the architrave into the pre-machined architrave groove in the door lining using a 'no nails' type adhesive.

White re-coatable foil faced finish frame and architrave requiring minimum on site decoration, therefore significantly easier to paint than a traditional primed MDF or timber lining.

Contemporary
58mm & 69mm

Ogee
58mm & 69mm

Torus
58mm & 69mm

All types are 22mm thick

Additional information

Glazed doors

Glazed doors are supplied with glass meeting the requirements of BS EN 12600. Factory glazed moulded, veneer and veneer match FD30 fire doors are available with either clear or wired glass.

Pairs

Pairs of doors are supplied with square, unrebrated meeting stiles. For ease of handling, these doorsets are delivered unassembled, apart from horizontal 4 line moulded and veneer match options which are not available.

Sound reduction option (44mm)

Sets with improved acoustic performance for use within domestic dwellings are available. These doorsets can be used where a 29dB sound reduction is required. Applies to single leaf doorsets only. Please contact Premdor for further details.

Accessory pack

All SpeedSet Plus doorsets are supplied with a pack containing all required fixing components, brackets, architrave joint clips, and screws.

N.B - Images are for illustration purposes only.

SoundSecure - apartment entrance doorsets

SOUNDSECURE

FD30 & FD60 SECURED BY DESIGN INTERNAL APARTMENT ENTRANCE DOORSETS

Secured by Design doorset specifically designed to meet the complex demands of internal apartment entrance locations.

SoundSecure apartment entrance doorsets are ideal for use in apartments or multi-occupancy dwellings and are specially designed to meet all performance and legislative requirements where security, fire and noise reduction performance are of paramount importance.

This diverse doorset for small or large scale building development projects is supplied with FD30S or FD60S fire doors in a variety of designs. All doorsets have full Secured by Design approval and incorporate door furniture including a high security multi-point locking system, spy hole, handles and door chain as standard.

The smart way to...

- ✓ Meet regulations
- ✓ Be safe
- ✓ Be secure

SoundSecure benefits:

- Secured by Design as standard – although a non SBD version is available, please contact Premdor for a competitive quotation.
- Available with all door options shown on pages 130-131.
- Choice of 838mm, 864mm, 914mm or 926mm standard door widths. Other sizes are available upon request.
- Mobility Part M compliant, depending on door size.
- FD30S doors are factory hung in an engineered softwood door frame.
- FD60S doors are hung in a paint grade hardwood frame only.
- Fully tested for fire performance against BS476 Part 22, Certifire approved.
- Can be configured as split or solid spindle.
- Supplied fitted with intumescent and combined acoustic / smoke / draught seal as standard.
- High quality, Secured by Design, police approved, modern three point espagnolette locking system, complete with chrome lever handles.
- Fire escape (thumb turn) cylinder to assist emergency escape in the event of a fire.
- Sound reducing door core, compliant with approved document E (29dB).
- Optional TS008: 2015 compliant brushed or polished stainless steel letter plate and cowl available.

SoundSecure - apartment entrance doorsets

Quick reference guide to your kit components

DOOR

- SoundSecure can be supplied with all FD30S (44mm) or FD60S (54mm) fire door options shown on pages 130-131.
- All doors are supplied with full Secured by Design approval.
- Door widths available: 838mm, 864mm, 914mm and 926mm.
- Special sizes are available upon request.

DOOR FRAMES

- FD30S doors are factory hung in an engineered softwood door frame
- FD60S doors are hung in a paint grade hardwood frame only.

LOCK AND HANDLE SYSTEM

- Secured by Design three point espagnolette locking system, complete with lever handles.
- Standard lock and handles provided can be used in both solid or split spindle modes.
- Locks are fitted with a fire escape (thumb turn) cylinder.

SEALS

- Acoustic/smoke/draught seal and intumescent seals incorporated at the frame head and jambs.
- All doorsets are acoustically rated at 29dB and are document E compliant.

HINGES

- Doors are hung on three CE marked steel security hinges.

DROP SEAL

- Self levelling drop seal is fitted at the bottom of the door as standard.

EYE VIEWER

- Chrome 180 vision 'frog eye' security eye viewer is supplied as standard.

THRESHOLD

- Aluminium seal is supplied as standard.

SECURITY CHAIN

- Chrome security door chain is included, TS003 compliant.

FIRE RATED LETTER PLATE AND COWL

- Optional TS008: 2015 compliant brushed or polished stainless steel letter plate and cowl.
- Cowl must be fitted in conjunction with the letter plate.

Full details are shown in our SoundSecure doorset literature. Please call 0844 209 0008 and request your copy or download from www.premdor.co.uk

Secured by Design

SoundSecure door and frame assembly meets the Secured by Design scheme requirements and is independently certified and tested within the TRADA Q. Mark Scheme. Premdor holds a SBD licence for this product. Where a Secured by Design specification is not required (for example in care homes or student accommodation applications) please ask for a quotation for our cost effective non-Secured by Design option.

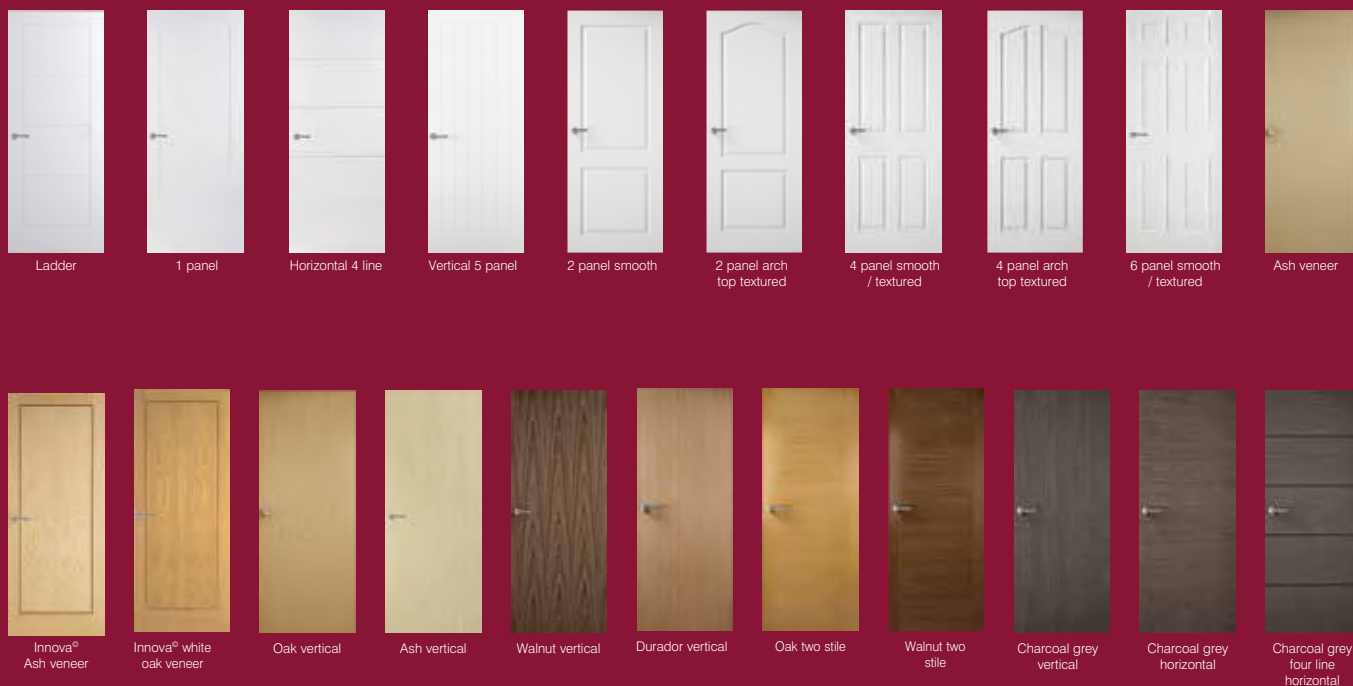

Images are for illustration purposes only. Actual product may vary.

SoundSecure - options

Door designs and finishes

SoundSecure doorsets are available with any standard flush or moulded panel design. All designs feature a three layer high density partical board core, with concealed hardwood lippings on the long edges of the doors.

Standard ironmongery

- All doorsets are supplied with a Secured by Design, police approved, 3 point espagnolette lock with an anti bump EuroProfile lock cylinder incorporating an internal thumb turn. All cylinders are fully protected from attack by a high specification cylinder guard.
- Lever handles are available in chrome (or optional silver) and can be fitted for use in either solid or split spindle modes.
- A chrome 180 vision 'frog eye' security eye viewer is supplied as standard.
- In addition, a chrome (or optional silver) security door chain is included to complement the system, compliant to TS003.

Chrome handles & thumb turn key cylinder
(Silver option available)

Chrome security eye viewer
(Mobility or standard location option)

Chrome security chain TS003 compliant
(Silver option available)

Door widths

Doorsets are available in four standard door widths.

Clear opening dimensions for doors are determined by a number of components, the table summarises this information by door size:

For wall aperture size, add 10mm clearance to above dimensions.

Special sizes available on request.

Door Width	Clear Opening		Overall Frame Size	Brickwork Opening	Clear Opening		Overall Frame Size	Brickwork Opening
	FD30S	FD30S	FD30S	FD30S	FD60S	FD60S	FD60S	FD60S
914mm x 1981mm	44mm	851mm	998mm x 2036mm	1008mm x 2046mm	54mm	838mm	986mm x 2030mm	996mm x 2040mm

(Based on a 18mm stop, 7mm hinge throw and a 3mm edge gap)

Premdor is a member of

General specifications

Fire rated letter plate and cowl

- Optional TS008: 2015 compliant brushed or polished stainless steel letter plate and cowl.
- Cowl must be fitted in conjunction with the letter plate.

Under door threshold

Extruded aluminium threshold prevents draught and smoke penetration. Hardwood threshold available upon request.

Dropseal

The variable height dropseal has a mechanism which lifts the seal clear of the floor as soon as the door is opened by a few millimetres. The seal is self-levelling and when fitted with the under door threshold will accommodate an under door gap of up to 12mm.

This threshold seal has passed a 100,000 cycle test with ease.

Door core specifications

PremCor high density FD30 / FD60

All SoundSecure doorsets are made using PremCor.

PremCor is a high density core material, which requires no timber framing.

When correctly installed with suitable intumescent strips, this proven construction will provide certified fire resistant, acoustic and security performance.

Exterior Richmond M&T

Richmond M&T

Available double glazed with toughened obscure glass, the Richmond door wonderfully showcases striking real hardwood veneers, masking a traditional mortise and tenon joint construction for maximum strength and dependability.

- Raised and fielded panels are firmly sealed into stiles and rails to prevent moisture penetration.
- High moisture resistant MDF panels eliminate expansion and contraction.
- Design incorporates real hardwood (Meranti) veneers.
- Supplied unfinished ready for staining or painting.
- Doors feature a 14mm double glazed unit with obscure glass in a chinchilla design toughened in accordance with European Standard BS EN 12150.
- Recommended for refurbishment and replacement projects only.
- Veneers are natural products and variations will occur.
- FSC® chain of custody.

Available in two different, yet attractive, designs, the timeless croft style door is also available as a Part L compliant option. Suitable for new build developments, the croft is available as a one light glazed option or in a classic stable design and exploits a traditional dowel joint construction, ensuring maximum strength and heat retention.

- Dowel joint construction ensures maximum strength between the stiles and rails.
- Solid engineered construction and grooved panels maximise heat retention allowing the door to meet current Part L Building Regulations.
- Design incorporates real American White Oak veneers.
- Supplied unfinished ready for staining or painting.
- Doors feature a single 20mm triple glazed unit with obscure glass in a lead and bevel design. Toughened in accordance with European Standard BS EN 12150.
- U-Value = 1.8 w / m²k
- Veneers are natural products and variations will occur.
- FSC® chain of custody.

Croft Part L detail

Glazing detail

Exterior entrance doors for use in all new build and as replacement doors are required to have a thermally efficient "U" value. The "U" value required for a particular application will be given in the local building regulations. The "U" values quoted in this Range Guide are manufacturer's calculations based the door leaf being hung in a timber frame to produce a doorset size 1000mmx2000mm. These values should be low enough to meet the requirements of Part L of the building regulations for England and Wales. Please check that these values are low enough to meet the requirements in the area where they will be installed prior to ordering.

Exterior matchboard

Matchboard FLB

Matchboard LB

Combining back-to-basic design with a conventional appearance, the Matchboard range is the first choice whenever a more traditional door is preferred. Competitively priced, matchboard doors are available on a reduced lead time in an improved specification and showcase a rustic appearance, perfect for paint finishing.

- Selected softwood.
- Doors are suitable for paint or joinery quality stain finish, (using water repellent external wood protective treatments).
- Components may be finger jointed (see page 180 for further details).
- LB doors are supplied with fixed braces. LB doors and FLB doors are not recommended for internal use or for use as a domestic entrance door. FLB doors are supplied loose pinned for on-site handing.
- Doors are not available factory glazed, finished, serviced or as a doorset.
- LB and FLB doors have FSC® chain of custody.
- FLB doors are 44mm thick with 14mm boards. LB doors use 18mm board with 20mm braces (loose pinned).

Exterior flush and glazed fire

Practical and cost-effective, Premdor's flush and glazed fire door range is suitable for a variety of commercial applications. With complementary door frames available to order, flush doors are lipped on both long edges, with doors in a standard core specification blocked where appropriate for ironmongery.

- It is advised that this range is used for refurbishment and replacement projects only and not on new builds.
- Flush doors used in exterior positions face particularly harsh performance requirements. Please note, variance in temperature and moisture levels between the outside and inside faces can often be considerable, causing distortion in the door, which is excluded from the Premdor guarantee. Installation within a porch or canopy is recommended, see page 186 for further details.
- Fire door option available on selected items.
- Door pairs and special sizes are available made to order. Please call 0844 209 0008 for further information.
- Flush doors are ready for on site paint finishing and **must be fully finished** on faces, all edges and ironmongery rebates **before** installation.
- Glass openings have equal side margins.
- Standard core doors are supplied apertured only (un-glazed).
- Fireshield doors are supplied with clear wired fire rated glass.
- Option Plus factory servicing is available on application (see page 176).

OPTION PLUS

Options can be ordered on all doors where suitable.

- Non standard sizes. Please see page 176 for further information.
- Factory priming (F1X face only). ■ Fireshield FD30 fire rated.
- Factory glazing. ■ Firemaster FD60 fire rated.
- Supply and fit intumescent seals to Fire doors.

Timber door frames

Premdor provides an all-encompassing range of exterior timber door frames and internal fire door frames, supplied in quality selected softwood, with or without hardwood cills.

Available in most popular door sizes, Premdor's exterior door frame selection is weather stripped as standard. Frames can also be ordered with a low-level weather-bar to ensure compliance with Part M of the Building Regulations, if required.

To complete its door frame collection, Premdor also offers a variety of interior fire door frames, each supplied with intumescent strips as standard – a crucial part of a full fire doorset assembly.

Internal frames

FCX (FD30) range

FCX range
To suit
Certfire approved doors

FD30 rated frames when used with appropriate door. 15mm intumescent strip fitted in jambs and head of frame as standard.

FCN (FD30) range

FCN range*
To suit
Premdor Fireshield doors

Fireshield door frames are suitable for use with other BWF-Certifire approved components in single leaf doorset applications. See relevant Certifire data sheet for more details.

FCX (FD60) Frame profile

FCX range
To suit
Premdor Firemaster doors

Dense hardwood material FD60 rated frame when used with appropriate door. Intumescent strips (2 x 15mm) fitted in jambs and head of frame as standard.

Exterior French and folding doors

The attractive French and folding range is affordable luxury at its very best.

Through this range, you will receive a beautiful product, which doesn't compromise on quality, safety or performance.

Sets are supplied 'ready to assemble', with most components pre-machined at our factory. This ensures ease of installation on site and the process also becomes easier for fitting the special hardware, locks and handles.

The doors are 54mm thick. Doors and frames are manufactured using a modern engineered construction for stability, and have a solid hardwood core and 3mm slices of oak or 3mm hardwood veneered on each visible surface.

The set has been factory finished with 3 coats of high-build micro porous finish applied and ready to install on site without further finishing (one total immersion dip coat and 2 top coats). The finish incorporates maximum UV protection.

Our sets come complete with doors, frame, cill, hardware, threshold, locks, handles, weather and draught seals.

Pull handle

Top track with rollers

Exterior oak French & folding doors

Premdor's high specification oak French doors allow you to bring the outside in, as well as effortlessly adding a touch of elegance to the home. Available at a surprising price, timber components are manufactured using the latest technology to reduce the risk of warping and twisting.

- The doors are 54mm thick, with both the doors and frames built using a modern engineered construction, with a solid hardwood core and 3mm oak surface.
- Sets are supplied 'ready to assemble', with most components pre-machined at our factory.
- The 24mm double glazed units incorporate special Low 'E' thermal glass, which is toughened to BS EN 12150 and BS EN 12600.

- Supplied unassembled for on site assembly, with full fitting instructions included.
- Our sets incorporate double weather and draught seals.
- Supplied with polished chrome hardware.
- Doors are open out only; the main opening door can be left or right.

Door Size	Code	Price
1190mm x 2074mm (4ft approx)	FDPFO4	£2,640.00
1490mm x 2074mm (5ft approx)	FDPFO5	£3,000.00
1790mm x 2074mm (6ft approx)	FDPFO6	£3,480.00
2390mm x 2074mm (8ft approx) includes 2 side lights	FDPFO8SL	£4,560.00

All doors are to the nearest metric equivalent size (allow an extra 10mm for brickwork opening sizes). Pre-glazed with 24mm argon filled Low 'E' double glazed units. See page 181 for brickwork openings.

Available in a range of popular sizes, Premdor's unique pre-glazed oak folding doors are fully-reversible, allowing the choice of right or left-hand opening. Incorporating real oak veneers, these stylish folding doors are perfect for homeowners who require easy access to their garden or patio.

- Door sets are factory finished with 3 coats of high-build micro-porous finish applied and ready to install onsite.
- All sets incorporate a 3 point insurance rated PAS 23/24 tested lock on the main access door and lockable slide bolt on the inside.
- These pre-glazed oak veneered sets are unique in that they are reversible, allowing the choice of right or left hand opening.
- Supplied unassembled for on site assembly, with full fitting instructions included.
- The doors are 54mm thick, with both the doors and frames built using a modern engineered construction, with a solid hardwood core and 3mm oak surface.
- Oak folding doors are supplied with a fully finished oak cill with aluminium sub cill for drainage.

Door Size	Code	Price
1790mm x 2090mm (6ft approx)	54PFO6	£4,440.00
2090mm x 2090mm (7ft approx)	54PFO7	£4,800.00
2390mm x 2090mm (8ft approx)	54PFO8	£5,040.00
2690mm x 2090mm (9ft approx)	54PFO9	£5,520.00
2990mm x 2090mm (10ft approx)	54PFO10	£7,560.00
3590mm x 2090mm (12ft approx)	54PFO12	£8,400.00
4190mm x 2090mm (14ft approx)	54PFO14	£9,480.00
4790mm x 2090mm (16ft approx)	54PFO16	£10,440.00

All doors are to the nearest metric equivalent size (allow an extra 10mm for brickwork opening sizes). Pre-glazed with 24mm argon filled Low 'E' double glazed units. See page 181 for brickwork and for door opening configurations.

Exterior hardwood French & folding doors

Exterior white French doors

Premdor's hardwood French doors readily meet the stringent requirements specified by Part L of the Building Regulations. Supplied fully-finished in a flawless white, each doorset is manufactured from superior hardwood.

- All of the timber components are manufactured using the latest technology to reduce warping or twisting.
- The doors are 54mm thick, with both the doors and frames built using a modern engineered construction, with a solid hardwood core and 3mm hardwood veneered surface.
- Sets are supplied 'ready to assemble', with most components pre-machined at our factory.

- The 24mm double glazed units incorporate special Low 'E' thermal glass, which is toughened to BS EN 12150 and BS EN 12600.
- Supplied unassembled for on site assembly, with full fitting instructions included.
- Our sets incorporate double weather and draught seals.
- Supplied with polished chrome hardware.
- Doors are open out only; the main opening door can be left or right.

Door Size	Code	Price
1190mm x 2074mm (4ft approx)	FDPFW-1L-4	£2,520.00
1490mm x 2074mm (5ft approx)	FDPFW-1L-5	£2,880.00
1790mm x 2074mm (6ft approx)	FDPFW-1L-6	£3,240.00
2390mm x 2074mm (8ft approx) includes 2 side lights	FDPFW-1L-8SL	£4,560.00

All doors are to the nearest metric equivalent size (allow an extra 10mm for brickwork opening sizes). Pre-glazed with 24mm argon filled Low 'E' double glazed units. See page 181 for brickwork openings.

Exterior white folding doors

Surprisingly affordable, without compromising on quality, Premdor's exceptional hardwood folding doors can be hung to operate from right to left or left to right. Utilising FSC® certified materials, doorsets are fully-finished using a three-coat, high-build system for optimum weather protection.

- Our hardwood folding white doors are fully finished using a 3 coat Hi Build Microporus Wood Coating System, so they are ready to install on site without further finishing.
- Sets are fully reversible so can be hung to operate from right to left or left to right.
- The set includes a 3 point locking system plus internal keyed drop bolts for extra security. The 3 point security locks are PAS 23/24 tested.

- Supplied unassembled for on site assembly, with full fitting instructions included.
- The doors are 54mm thick, with both the doors and frames built using a modern engineered construction, with a solid hardwood core and 3mm hardwood veneered surface.
- Folding doors are supplied with a fully finished hardwood cill with aluminium sub cill for drainage.
- Supplied with polished chrome handles and stainless steel hardware.

Door Size	Code	Price
1790mm x 2090mm (6ft approx)	54PFW6	£3,960.00
2090mm x 2090mm (7ft approx)	54PFW7	£4,200.00
2390mm x 2090mm (8ft approx)	54PFW8	£4,560.00
2690mm x 2090mm (9ft approx)	54PFW9	£5,040.00
2990mm x 2090mm (10ft approx)	54PFW10	£6,840.00
3590mm x 2090mm (12ft approx)	54PFW12	£7,440.00
4190mm x 2090mm (14ft approx)	54PFW14	£8,760.00
4790mm x 2090mm (16ft approx)	54PFW16	£9,360.00

All doors are to the nearest metric equivalent size (allow an extra 10mm for brickwork opening sizes). Pre-glazed with 24mm argon filled Low 'E' double glazed units. See page 181 for brickwork and for door opening configurations.

Save time and cost by adding our factory options to your door. Prices are available on application.

Factory machining for hinges and/or latches (minimum order quantities apply).

- A cost effective way to accurately machine mortices.
- Saves time on site and improves consistency and quality.
- Available on Moulded, Innova, Veneer and Paint grade plus doors.
- Machining is not available for ironmongery shown on pages 116-119.
- Premdor only service rounded hinges.

Factory glazing

- Doors can be supplied fully factory glazed where applicable.
- Available on both Solid core Safe 'N' Sound and fire door options.
- Glazed mobility fire doors meet Building Regulation Part M.
- Fire doors available with either clear, clear wired or obscure glass.
- Available on Moulded, Veneered, Popular Paint grade and Paint grade plus doors.

White factory paint face finishing

- Textured moulded panel doors can be supplied factory face only finished in white satin paint (RAL 9003). **Does not include door edges.**
- Edge banding also available. Please specify if required.
- Cost effective solution, providing a high quality durable paint finish.
- Paint finish guaranteed for two years.
- 'Touch up' paint available for on-site repair.

Order code: 43075 (can)

Factory priming

- Textured and smooth moulded panel doors and Popular paint grade doors can be supplied factory face only primed. Does not include door edges.
- Reduces the number of coats of paint required on site.
- Saves time and reduces site painting costs.

Non standard sizes

- If our standard sizes do not meet your requirements, non-standard sizes are available. Details and quotation available on request.
 - Available on Moulded, Veneer, Popular Paint grade and Paint grade plus doors.
- N.B. On moulded doors special sizes may be limited by the configuration of the mouldings.

Supply and fit intumescent seals to fire doors

- Standard intumescent and combined intumescent smoke seal available.
- Saves time on site.
- Ensures that the correct seal is accurately fitted in line with fire test certification.

Moulded door general specification

Door specification

Imperial doors: 35mm (1³/₈").

Metric doors: 40mm / (1⁹/₁₆").

Fireshield doors: 44mm (1³/₄").

Firemaster doors: 54mm (2¹/₈").

Modification

Doors are not suitable for rebating to form a pair. Fire doors must not be trimmed on top edge, and only up to 10mm on bottom edge and 10mm on stiles. Non fire rated doors can be trimmed by up to a maximum of 5mm off any edge, except Safe 'N' Sound which can be trimmed 12mm on long edges.

Glazing

Glazed doors are supplied with glass safety tested to the requirements of BS EN 12600 and BS EN 12150.

On site preparation may be required to bead pin holes.

Door finishing

Moulded panel doors are suitable for paint finish only. Door faces are supplied with a white base coat ready for on site finishing. Base coat and priming does not seal the door fully against moisture penetration on site.

Touch up paint

Order code: 43075 – Cans.

Lock block location on Standard Core doors

'Lock' is inkjetted on the top edge of the door on the side where the lock block is positioned. The lock block position is **880mm** from the top of the door to the top of the lock block. The lock block is **360mm** long. See page 183.

Bi-fold doors

Bi-fold doors have the moulded panel design on both sides and are suitable for use as room dividers or wardrobe doors. The doors are supplied pre-hinged with running gear included. Door sizes shown are nominal, with actual dimensions slightly smaller to allow for door gear and clearance.

For track and kit guarantee please contact the sales office.

Standard core

Economy core specification, with single lock block, for light duty applications. See page 183.

Semi-solid core

Semi-solid doors are made with additional core components giving a heavier feel to the door. See page 183.

Safe 'N' Sound

A solid core specification, in a standard thickness door, offering a substantial feel. See page 183.

Fire door core

Moulded fire doors are constructed using a high density chipboard panel within a timber frame. See page 183.

Fire doors

Premdor Fireshield FD30 fire doors are compliant with British Standards and the BWF Certifire Scheme. See relevant data sheet for more details.

Fireshield doors are rated FD30 when hung in appropriate frame with the correct **intumescent strips** in the jambs and head, or top and long edges of the door. Glazed

Fireshield doors are supplied with clear (unwired) fire rated glass as standard.

Firemaster doors are rated FD60 when hung in appropriate frame with the correct **intumescent strips** in jambs and head, or top and long edges of door. Glazed

Firemaster doors are supplied with clear (unwired) fire rated glass as standard. Please see data sheet attached to the door.

Building regulations (England & Wales)

Moulded doors are offered fully compliant with Building Regulations where applicable.

Fire safety: Standard doors are tested to BS476 Part 22 and certified for use meeting Approved Document B.

Mobility: The range includes size options and glazing designs suitable for use under Approved Document M.

Acoustics: FD30 fire doors have demonstrated a sound reduction value of 29Rw dB, which meets the requirements needed for flat entrance doorsets in accordance with approved Document E. When hung appropriately, in a suitable frame with fitted perimeter seals and compliant hardware. Please contact Premdor for details.

Scottish and Northern Irish Regulations may also be applicable on a Regional basis and doors are similarly compliant.

Guarantees

Guaranteed for ten years against manufacturing defects. Guarantees are subject to the products being treated in accordance with Premdor's instructions for storage, handling, installation, maintenance and use and exclude ironmongery where applicable. Failure to follow these instructions may invalidate your guarantee. This does not affect your statutory rights.

Environmental policy

Moulded standard core doors are environmentally third party certified FSC®.

Semi-solid core, Safe 'N' Sound and Fireshield doors are all environmentally third party certified PEFC.

Our manufacturing and central warehouse facility in the UK is located at Barnsley and has been independently accredited to meet the environmental management standard ISO 14001.

All of our timber based material suppliers are obligated to ensure that, as a minimum, wood is sourced in accordance with local legal forestry and logging controls, and is **EUTR compliant**. The majority of timber used in Premdor manufactured products is certified under FSC®, PEFC, MTCC, CSA or SFI approval. These schemes are recognised under guidance issued by the Government's Central Point of Expertise on Timber (CPET), ensuring credible environmental control. Relevant products are marked with the icon shown, based on information correct at time of printing.

Product availability

Items shown **highlighted** are available on a reduced lead time.

Ordering

Door prices exclude ironmongery and frames. Except where stated, doors supplied will require on site decoration. When ordering always state product codes. All prices exclude VAT. Specifications may vary at our discretion.

Trademarks

Safe 'N' Sound, Fireshield and Firemaster are all Premdor trademarks.

Storage and handling

Doors should be stored and handled as prescribed in the BS Code of Practice BS 8000 Part 5 1990.

Doors should be laid flat on three equal thickness bearers located along the door length to evenly distribute weight and avoid damage, and kept dry and clean inside any polythene packaging until immediately before painting. Do not store or install in an area which may be subject to extremes of temperature. Use a dry, well ventilated building, in areas which have not been recently plastered.

It is essential that precautions are taken to prevent moisture content build up. Particular care is needed in centrally heated or air conditioned buildings. Premdor must be informed at the time of tender and order whenever doors are needed for such buildings.

The testing and rapid switching on and off of heating during the construction is detrimental to joinery.

It is important that any packaging material (shrink wrap etc.) is left on the door for as long as is practically possible to avoid damage to door surfaces. This is particularly relevant to fully finished products.

Installation

Doors should be fitted as prescribed in the BS Code of Practice BS 8000 Part 5.

It is essential that doors be fully sealed immediately after delivery. They should be sealed and knotted and primed on both faces and all four edges, and should then be fully finished, preferably before installation.

It is essential that if the finish is broken in any way (e.g. trimmed, drilled or cut for letter box, hinges etc.) then any such exposed area should be painted/sealed. If, when installing doors, a reduction in overall size is required, it is important that equal amounts are taken from opposite edges. Allowable trim dimensions available on request.

When fitting locks and latches in doors, it is important to ensure that the construction and performance of the door is not adversely affected.

All doors should be hung 1¹/₂ pair suitable for the weight of the door, fire doors please see data sheets provided with each door.

Finishing

Decoration should be carried out in accordance with BS 6150 and BS 8000 Part 5. Products must be clean and dry prior to finishing, having moisture content which is no greater than the average for the intended location. Always follow the manufacturers instructions provided with the paint which is to be applied.

It is important that the finishing system is balanced by equal application to both sides at the same time to ensure that an imbalance of moisture does not occur, particularly in the decoration of doors. The complete surface area should be fully treated with topcoat paint prior to installation. To ensure adequate coverage at least three coats of topcoat paint needs to be applied. All edges and any areas which have been cut, drilled, etc. must be fully painted to the same standard as the rest of the door.

Premdor has no control over customer applied finishes of doors and therefore cannot accept any claims for problems of any type relating to customer finishing of the doors.

Do not use oil (e.g. Danish oil) waxes, polishes or dyes as they do not properly seal the door. Coatings must be regularly maintained to prevent a breakdown of the protective paint film, which can lead to moisture ingress/loss and deterioration of the door.

Please note

Finger-jointed materials may be used in manufacture, enhancing product stability.

Apertures to fire doors may only be added retrospectively by Premdor or by Premdor appointed "FAST" licensed door processors, operating as members of the BWF/CERTIFIRE scheme. Modifications made outside of this scheme will invalidate the product certification. Location and contact details of "FAST" licensees available on request.

Timber door general specification

Door specification

Imperial doors: 35mm (1³/₈") or 44mm (1³/₄").

Metric doors: 40mm (1⁹/₁₆").

Fireshield doors: 44mm (1³/₄").

Internal slab construction doors have 10mm lippings to all four edges of the door.

Internal stile and rail construction doors have 12mm lippings to all four edges of the door.

Internal FD30 doors have 13mm lippings to the top and bottom edge. 10mm lippings to each long edge.

If it is necessary to reduce the size of the door, for internal non fire rated doors, do not trim more than 5mm from any side / top or bottom. Fire doors can be trimmed up to 3mm from either side and 6mm from the bottom (do not trim top of door).

Door finishing

Veneers are natural products and variation will occur especially when used as a door pair.

4 panel, 2 light glazed, Wiltshire, Shaker, 1930's Shaker, Croft solid, Croft solid glazed, Milano, Nice and Ladder doors are supplied un-finished and ready for finishing on site with paint or stain.

Apply a minimum of 3 top coats of a high quality interior door finish specially formulated to protect interior doors following the manufacturer's recommendations and ensuring that the door is correctly primed and undercoated. Use a high quality permeable, micro porous wood door finish specially formulated for interior doors.

4 panel, 2 light glazed, Croft solid and Milano are also supplied as a fully finished option. Doors are finished with a 3 - part Polyurethane coating for lasting protection.

Special order sizes

Premdor can only offer the sizes stated in the catalogue. Bespoke orders in this range are not available.

Pairs

Single doors featuring bevel edged or decorative glass should be hung selectively to ensure fully matched glazing if used as pairs. Premdor cannot guarantee matching grain or colour on timber doors when used as pairs.

Options

Please note that Option Plus servicing is not available on timber doors. Timber doors are not available for use within SpeedSet or SoundSecure doorsets.

Environmental policy

All oak doors are environmentally third party certified PEFC.

Guarantees

Guaranteed for five years against manufacturing defects

Product availability

Items shown **highlighted** are available on a reduced lead time.

Ordering

Door prices exclude ironmongery and frames. Except where stated, doors supplied will require on site finishing. When ordering always state product codes. All prices exclude VAT. Specifications may vary at our discretion.

Storage and handling

Doors should be stored and handled as prescribed in the BS Code of Practice BS 8000 Part 5. Doors should be laid flat on three equal thickness bearers located along the door length to evenly distribute weight and avoid damage, and kept dry and clean inside any polythene packaging until immediately before painting/ staining. Do not store or install in an area which may be subject to extremes of temperature. Use a dry, well ventilated building, in areas which have not been recently plastered. It is essential that precautions are taken to prevent moisture content build up. Particular care is needed in centrally heated or air conditioned buildings. Premdor must be informed at the time of tender and order whenever doors are needed for such buildings. The testing and rapid switching on and off of heating during the construction is detrimental to joinery.

Doors should not be exposed to sunlight since natural shading or fading might occur. It is important that any packaging material (shrink wrap etc.) is left on the door for as long as is practically possible to avoid damage to door surfaces. This is particularly relevant to fully finished products.

Installation

Doors should be fitted as prescribed in the BS Code of Practice BS 8000 Part 5.

It is essential that doors be fully sealed and any air gaps plugged, immediately after delivery.

Edges of doors with lacquer finish should be sealed and if any surface is subsequently cut, it should be painted or lacquered before the door is fixed into position. This particularly applies when end grain is exposed. It is essential that if the preservative seal is broken in any way (e.g. trimmed, drilled or cut for letter box, hinges etc.) then any such exposed area should be sealed, painted/stained. If, when installing doors, a reduction in overall size is required, it is important that equal amounts are taken from opposite edges. Allowable trim dimensions available on request. When fitting locks and latches in doors, it is important to ensure that the construction and performance of the door is not adversely affected. If a mortice lock is to be fitted, it must not be located opposite the mid rail of the door. Letterplates, locks etc. should be installed prior to the door being hung.

Factory finished products

Coated surfaces require regular maintenance and cleaning at least annually to remove surface pollution. Some 'chalking' of the finish may occur over time due to natural erosion of the microporous paint film. This does not detract from the systems protective performance. On occasion timber products may exude resin after installation. Typically, if resin is present this 'bleeding' cannot be prevented. Discolouration can occur which will require attention and maintenance to retain the aesthetics and integrity of the coating. Resin exudation is excluded from our performance guarantee.

Finishing

Decoration should be carried out in accordance with BS 6150 and BS 8000 Part 5. Products must be clean and dry prior to finishing, having moisture content which is no greater than the average for the intended location.

Always follow the instructions provided with the stain or paint which is to be applied.

It is important that the finishing system is balanced by equal application to both sides at the same time to ensure that an imbalance of moisture does not occur, particularly in the decoration of doors. The complete surface area should be fully treated with topcoat paint or stain prior to installation. To ensure adequate coverage at least three coats of topcoat paint/stain needs to be applied. All edges, rebates for glazing and any areas which have been cut, drilled, etc. must be fully painted/ stained to the same standard as the rest of the door.

Premdor has no control over customer applied finishes of doors and therefore cannot accept any claims for problems of any type relating to customer finishing of the doors.

We do not recommend the use of varnish as there may be adhesion problems due to the resinous nature of some hardwoods. Do not apply varnish coatings to these doors.

Do not use oil (e.g. Danish oil) waxes, polishes or dyes as they do not properly seal the door and can lead to delamination of the veneer.

Coatings must be regularly maintained to prevent a breakdown of the protective paint or stain film, which can lead to moisture ingress/loss and deterioration of the door.

Please note

Finger-jointed materials may be used in manufacture, enhancing product stability.

Veneered & flush door general specification

Door specification

Imperial doors: 35mm (13/8") or 44mm (13/4").

Metric doors: 40mm (1 9/16").

Fireshield: 44mm (13/4").

Firemaster: 54mm (21/8").

Pairs

Please see relevant data sheet or contact Premdor for advice.

However, **Premdor cannot guarantee matching grain or colour on standard veneered or Innova pairs.**

Portfolio Veneer Match Charcoal and Light grey four line horizontal doors are not suitable for door pairs due to potential alignment issues.

In addition, rebated pairs, or pairs with a double acting hanging action must be ordered specifically. Contact Premdor for more advice.

Standard veneers

Veneered doors are manufactured using commercially available veneer cuts and lipping's.

As with any natural material, colour and graining does vary and should be expected, according to species.

Our standard veneer cut specifications are:

Anegre – mixed crown, half crown & quarter cut

European Ash – mixed crown & half crown

Ash Innova 1 panel – crown or half crown centre panel, quarter. Cut stiles & rails

Steamed Beech – quarter cut only (slip match)

Koto – quarter cut only

Maple – mixed crown, half crown & quarter cut

Sapele – quarter cut only

American White Oak – mixed crown & half crown.

White Oak Innova – 1 panel crown or half crown centre panel, quarter cut stiles & rails

American Black Walnut – mixed crown & half crown

Portfolio Doors

Portfolio doors are made with full chain of custody (FSC®), engineered veneers that provide an industry leading colour and grain match.

As with all timber products, prolonged exposure to direct sunlight may cause colour changes in these veneers.

Doors are 35mm standard core for Durador and 35mm solid core for all other designs.

Doors are lipped two long edges as standard.

Beading

Paint grade doors are supplied with beads unfinished ready for on site treatment. All other doors are supplied with beads to complement the veneer faces.

Reproduction

Drawings and photographs are intended as being illustrative only and do not represent a product offering. Colours and photographs depicted are as accurate as photographic and printing processes can allow.

Guarantees

Guaranteed for ten years against manufacturing defects.

Guarantees are subject to the products being treated in accordance with Premdor's instructions for storage, handling, installation, maintenance and use and exclude ironmongery where applicable. Failure to follow these instructions may invalidate your guarantee. This does not affect your statutory rights.

For storage, handling, installation and maintenance information, please see page 180 & 181.

Standard core

Cost effective core specification, with single lock block at mid height, for light duty applications.

Solid core

A 35mm Solid core construction provides more than twice the weight of a standard core door providing a much sturdier feel.

Solid core provides the extra benefits of added strength, durability and flexibility.

Fire door core

Flush fire doors feature either a modern, full, three layer, particleboard construction (PremCOR), or a traditional framed up solid core / TubeCORE construction. Unless specified any core type could be supplied.

ExtraCORE

The ExtraCORE option is available in some ranges where extra trimming is required on site, such as with refurbishment situations. Approximately 40mm can be removed from each door stile or rail without affecting the integrity of the door. It is recommended that equal dimensions are removed from opposite edges. For full details please contact Premdor.

Fire doors

Premdor fire doors are compliant with British Standards and the BWF Certifire Scheme. See relevant data sheet for more details if required.

Fireshield is FD30 rated, when hung in appropriate frame with the correct **intumescent strips** in jambs and head, or top and long edges of the door. An additional 15 x 4mm strip is required to the hanging edge or frame jambs and also frame head rebate. Glazed Fireshield doors are supplied with clear (unwired) fire rated glass as standard. Please see data sheet attached to door.

Firemaster is FD60 fire rated when hung in appropriate frame with the correct **intumescent strips** in jambs and head, or top and long edges of door. Please see data sheet attached to door.

Apertures to fire doors must only be added retrospectively by Premdor or by Premdor appointed "FAST" licensed door processors, operating as members of the BWF/CERTIFIRE scheme. Modifications made outside of this scheme will invalidate the product certification.

Location and contact details of "FAST" licensees available on request.

CF 625 A 014049
PREMDOR
Tel: 01228 383434

Fire Door Certification issued unless tampered and maintained exactly in accordance with Manufacturer's instructions and this label is to remain unmarked and not removed.

Glazed flush fire doors

Premdor flush fire doors are compliant with British Standard and are Certifire approved.

Glazed apertures must **not** be added retrospectively on site.

Building regulations

Flush doors are offered fully compliant with Building Regulations where applicable.

Fire safety: Standard doors are tested against BS 476 Part 22 and certified for use meeting Approved Document B.

Mobility: The range includes size options and designs suitable for use under Approved Document M.

For specific information please check current Building Regulations.

Fitting FD30 glazing system

FD30 glazing system fitted

Acoustics: FD30 fire doors have demonstrated a sound reduction value of 29Rw dB, which can assist in meeting the requirements needed for flat entrance systems against Approved Document E.

In all cases doors require to be hung appropriately, in a suitable frame with fitted perimeter seals and compliant hardware. Please contact Premdor for details.

Scottish and Northern Irish Regulations may also be applicable on a Regional basis and doors are similarly compliant.

Environmental policy

Doors indicated are environmentally third party certified FSC® or PEFC.

Product availability

Items shown **highlighted** are available on a reduced lead time.

Ordering

Where indicated, door prices include glass, but exclude ironmongery and frames. Popular and Paint Grade doors supplied will require on site finishing. When ordering always state product codes. All prices exclude VAT. Specifications may vary at our option.

External door general specification

Door specification (excluding FLB & LB)

Standard doors: 44mm (1³/₄").

Fireshield: 44mm (1³/₄").

Firemaster: 54mm (2¹/₈").

Beading

Unglazed softwood, panel and flush doors are supplied with bead packs as standard.

Glazing suitability

Unglazed exterior feature and panel doors are suitable for double glazing up to 14mm thick, unless indicated for single glazing only.

Traditional feature doors are not available factory glazed, finished or serviced or as a doorset.

Door finishing

There can be no guarantee against moisture ingress / loss related problems (such as swelling, shrinkage, warping, splits and open joints) if the door is not correctly coated with a quality exterior door finish specifically formulated to protect exterior doors. Do not use non-permeable coatings on exterior doors. If using a water based product, this may lift the fibres of the timber veneer. Do not use stain, waxes, polishes, dyes or oils (e.g. Danish oil) as they do not properly seal the door and can lead to delamination of the veneer. Do not apply varnishes to the door as due to the resinous nature of some hardwoods there can be adhesion problems causing a breakdown in the coating.

Traditional hardwood feature and panel doors require full decoration prior to installation.

Please note that both hardwood and Oak products will vary in finished appearance due to colour variation in timber materials.

Hemlock panel doors are often stain finished on site, however, as ply panels may not match timber framing, and visible finger joints may occur, this type of decoration may not achieve a satisfactory finish. The use of paint finish is therefore recommended.

FLB and LB doors must be finished as soon as they arrive on site to prevent moisture movement.

None of these doors are treated with preservative. Decoration must be carried out in line with BS6150 and BS8000 Part 5.

Weather protection

To ensure door and door frame provide adequate performance in exposed situations, it is recommended that installation is within a porch or canopy. This is particularly critical with open in doors and pairs.

Letterplates

When installing flush or fire doors, if a letterplate is required this should be of the sleeved type to ensure protection against water ingress into the exposed door core. In fire doors letterplates must be Certifire approved fire resisting design.

Face fixed weatherboards

On timber doors a face fixed weather-board is required.

Hardwood: Code 46979 Price £25.00.

Softwood: Code 45179 Price £25.00.

Fire doors

Premdor fire doors are compliant with British Standards and the BWF Certifire Scheme. See relevant data sheet for more details if required.

Fire door core

Exterior Flush fire doors feature a traditional framed construction.

Fireshield FD30 rated, when hung in appropriate frame with the correct intumescent strips in jambs and head, or top and long edges of the door. Glazed Fireshield doors are supplied with fire rated glass as standard. Please see data sheet attached to door.

Firemaster FD60 fire rated when hung in appropriate frame with the correct intumescent strips in jambs and head, or top and long edges of door. Single FD60 exterior flush doors cannot be used to form pairs. Please see data sheet attached to door.

Thermal efficiency

'U' values are indicated alongside products in this section for guidance only. All values shown are manufacturers calculations, based on material content for an 838mm size door within a doorset. The 'U' value indicates the thermal efficiency (w/m²/k) the lower the 'U' value the greater the energy saving.

Building regulations

Croft triple glazed and croft stable triple glazed are suitable for 'Part L' projects.

Oak Part L feature doors

Exterior entrance doors for use in all new build and as replacement doors are required to have a thermally efficient "U" value. The "U" value required for a particular application will be given in the local building regulations. The "U" values quoted in this Range Guide are manufacturer's calculations based the door leaf being hung in a timber frame to produce a doorset size 1000mm x 2000mm.

Please check that the "U" value quoted in this Range Guide is low enough to meet the requirements of the building regulations in the place where the door will be installed.

Modification

External slab construction doors have 10mm lipping's to each long edge. 19mm lipping's to top and bottom. External stile and rail doors have 19mm lipping's to all four edges of the door.

Installation

It is essential that doors be fully sealed and any air gaps plugged, immediately after delivery. They should be sealed and knotted and primed on both faces and all four edges, and should then be fully finished, preferably before installation. Any surface subsequently out should be primed before the door is fixed into position. This particularly applies when end grain is exposed.

It is essential that if the preservative seal is broken in any way (e.g. trimmed, rilled or cut for letter box, hinges etc.) then any such exposed area should be preservative treated, painted/stained.

Decorative finished products

Coated surfaces require regular maintenance and cleaning at least annually to remove surface pollution. Some 'chalking' of the finish may occur over time due to natural erosion of the microporous paint film. This does not detract from the systems protective performance.

If it is necessary to reduce the size of the door, for external doors, do not trim more than 5mm from any side / top or bottom.

Finishing, use a high quality permeable, micro porous wood door finish specially formulated for external doors.

Special order sizes

Premdor can only offer the sizes stated in the catalogue. Bespoke orders in this range are not available.

Please note Premdor's Hardwood feature doors, Softwood panel doors and Exterior flush doors may not always be compatible with the building regulations that apply to new build or home extensions.

Guarantees

Guaranteed for 1, 2 or 5 years against manufacturing defects. Guarantees are subject to the products being treated in accordance with Premdor's instructions for storage, handling, installation, maintenance and use and exclude ironmongery where applicable. Failure to follow these instructions may invalidate your guarantee. This does not affect your statutory rights.

Product availability

All items shown **tint flashed** are normally available on a reduced lead time. Some designs may be discontinued during the life of this Range Guide.

Ordering

Door prices exclude glass, letterplate aperture, ironmongery and frames unless where otherwise stated. Where applicable doors will require on site finishing. When ordering always state product codes. All prices exclude VAT. Specifications may vary at our discretion.

Timber door frames

Weather protection

To ensure doors and door frames provide adequate performance in exposed situations it is **recommended that a porch or canopy is installed**. Door frames are supplied with factory fitted weather strip. One hour fire door frame with a 57mm x 90mm head and jamb has 25mm (1") rebates. Half hour fire door frames have the option with or without cill. The cill is flush 50 x 78mm with the head and jambs 57 x 78mm.

Weatherbar set

Silver coloured aluminium low level weatherbar supplied loose for on site fitting as standard on mobility frames.

Frame finishing

All softwood frames are vacuum preservative treated and supplied with a 'Honey' prime finish.

Hardwood cills are supplied without a base coat stain.

Guarantees

Guaranteed for 30 years against fungal attack and rot (softwood only).

Guaranteed for ten years against manufacturers defects.

Storage, handling, installation, maintenance and use

Storage and handling

Doors and doorsets should be stored and handled as prescribed in BS Code of Practice BS 8000 Part 5.

Doors and doorsets should be kept dry and clean inside the polythene packaging until immediately before painting/staining. Do not store or install in an area which may be subject to extremes of temperature. Use a dry, well ventilated building, in areas which have not been recently plastered.

It is essential that precautions are taken where there is a risk of moisture content build up. Particular care is needed in centrally heated or air conditioned buildings.

Premdor must be informed at the time of tender and order whenever doors are needed for such buildings. The testing and rapid switching on and off of heating during the construction is detrimental to joinery.

Doorsets are heavy! Take care when lifting or handling. Consider fully any handling risk, including danger from glazed panels.

On occasion timber products may naturally exude resin after installation. Typically, if resin is present this 'bleeding' cannot be prevented and Premdor are unable to accept liability.

Discolouration can occur which will require attention and maintenance to retain the aesthetics and integrity of the coating. On occasion timber products may exude resin after installation. Typically, if resin is present this 'bleeding' cannot be prevented. Discolouration can occur which will require attention and maintenance to retain the aesthetics and integrity of the coating. Resin exudation is excluded from our performance guarantee.

Exposure conditions can vary significantly according to location. South facing elevations and coastal sites will reduce to some extent the finish life to first maintenance. Our guarantees are intended to cover reasonable average UK conditions.

French and folding doorsets

Doorset

The finished frame height is 2074mm for French doors and 2090mm for the folding doors.

Handing

French sets open outwards and thanks to our unique reversible technology, either the left or right door can be used as the main opening door.

Folding sets are reversible from the same set for left or right opening which can be chosen on site.

Glazing

The 24mm double glazed units incorporate special Low 'E' thermal glass with an argon filling to enhance the thermal performance, the double glazed units are fitted into the doors so there is no glazing required on site. The glass is toughened to the 2 latest European standards BS EN 12150 and BS EN 12600.

Finishing

The sets have been factory finished with 3 coats of high-build microporous finish applied and ready to install on site without further finishing. One total immersion dip coat and 2 top coats. The finish incorporates maximum UV protection.

It is very important that the finish on your door set is checked and re-coated after 12 months (six months in coastal areas). This will maintain the decorative finish and ensure that no moisture enters the timber of the doors and frames during the life of the product.

The length of time between re-coating depends greatly on exposure to weather and the direction the sliding/ folding doors face. The coating will last longer in a sheltered or north facing site. However, if the site is south facing, or in a heavy weather exposure area, we recommend checking for break down every six months after purchase and re-coating if necessary.

We recommend that your door set is maintained and refinished using medium or high-build microporous wood finishes. In addition, it's better to refinish as soon as you see any breakdown of the finish. Don't wait until it's too late and the finish has completely broken down allowing moisture into the wood.

We do not recommend the use of yacht varnish, waxes or oil applications to pre-finish our doorsets for external use.

Weather protection

All of our sets incorporate double weather and draught seals.

Locking systems and ironmongery

The doorsets are supplied with a multi-point locking system. The handles are of a chrome effect and are supplied loose, ready for fitting on site.

Thermal efficiency

U The Building Regulation Part L rating of the whole set is 1.7W/m²K which passes the regulations for refurbishment, extensions to existing dwellings or new build homes. The Low 'E' glass used has a 1.1W/m²K rating. Please note that the 'U' Values are indicated alongside products for guidance only. Values shown are independently tested by an

accredited testing company. The 'U' value indicates thermal efficiency (W/m²K). The lower the rating the greater the energy saving. For further information see Building Regulations Part L.

'U' Values

Folding doors • Part 'L' 1.5 W/(m²K) • Glass 1.1 W/(m²K)
French doors • Part 'L' 1.7 W/(m²K) • Glass 1.1 W/(m²K)

Guarantees

Guarantees are subject to the products being treated in accordance with Premdor's instructions for storage, handling, installation, maintenance and use and exclude ironmongery where applicable. Failure to follow these instructions may invalidate your guarantee. This does not affect your statutory rights.

Factory fitted glass carries a 5 year guarantee.

Guaranteed for 10 years against doors and hardware manufacturers defects.

Ordering

All prices exclude VAT. Specifications may vary at our option.

Handings and brickwork sizes:

Choose between left or right handing – There is no need to order left or right opening sets as our folding sets are all reversible and this can be chosen when the set arrives on site. All our folding doors fold outside to allow maximum use of space in your room.

Brickwork sizes and how your folding doors open

3 door configuration

6' Brickwork size 1800 x 2100mm
7' Brickwork size 2100 x 2100mm
8' Brickwork size 2400 x 2100mm
9' Brickwork size 2700 x 2100mm

4 door configuration

10' Brickwork size 3000 x 2100mm

5 door configuration

12' Brickwork size 3600 x 2100mm

6 door configuration

14' Brickwork size 4200 x 2100mm
16' Brickwork size 4800 x 2100mm

Finishing

Decoration should be carried out in accordance with BS 6150 and BS 8000 Part 5.

Products must be clean and dry prior to finishing, having a moisture content which is no greater than the average for the intended location. Always follow the instructions provided with the stain or paint which is to be applied. Where necessary, Shellac knotting may be applied to honey primed door frames to aid resistance to resin staining subsequent to paint finishing.

The use of dark coloured paint finishes should be avoided on all softwood external joinery to minimise solar gain. A neutral colour undercoat should be considered when it is desired to finish frames in pastel shades.

It is important that the finishing system is balanced by equal application to both sides at the same time to ensure that an imbalance of moisture does not occur, particularly in the decoration of doors.

The complete surface area should be fully treated with topcoat paint or stain prior to installation. To ensure

adequate coverage at least three coats of topcoat paint/ stain needs to be applied. All edges, rebates for glazing and any areas which have been cut, drilled, etc must be fully painted/stained to the same standard as the rest of the door.

Do not use oil (e.g. Danish oil) waxes, polishes or dyes as they do not properly seal the door and can lead to delamination of the veneer.

Coatings must be regularly maintained to prevent a breakdown of the protective paint or stain film, which can lead to moisture ingress/loss and deterioration of the door.

Maintenance

At annual intervals or more frequently if necessary, inspect and lubricate all ironmongery, hinges, pivoting and sliding parts. Inspect the condition of the decorative and glazing systems on all external joinery at maximum intervals of one year and carry out remedial work as required.

Weather protection

It is recommended that exterior doors which are to be located in exposed areas should be protected by a canopy or porch.

Please note

Finger-jointed materials may be used in manufacture, enhancing product stability.

Timber door frames

If stored outside, the frame should be placed on level bearers and protected by a tarpaulin. There must be space for air to circulate around and between the frames.

Check that the frame is perfectly square by measuring the frame diagonals. These are exactly the same length if the frame is square.

NOTE: On external door frames for fire doors, the gap between the frame and brickwork must be packed with a non-combustible material, for example, mineral wool fibre.

Distributor information

To contact the Premdor sales office, telephone: **0844 209 0008**

To place an order, please use the details below;

INTERNAL & EXTERNAL DOORS

Premdor, Birthwaite Business Park, Huddersfield Road, Darton, Barnsley. S75 5JS.

Facsimile: 0844 371 5333 (orders)
0844 371 5334 (general enquiries)

Email: barnsleysales@premdor.com

Please ensure all orders are coded. This helps us to supply the correct product.

How to code your order

Door orders

1. Select the numeric code for the chosen door;
Interior 6 panel moulded
762 x 1981 x 35mm = 12411
2. Select any options required e.g.
white factory paint face finishing.

How to place your order

Orders can be placed in various ways:

1. Order by fax.
2. Order by post.
3. Order by email
3. Order by E.D.I. (contact us for details).

Full information about our Sales Office is shown above.

The information needed to process your order:

1. Your company name and address.
2. An order number.
3. A postcoded delivery address (including a contact name and telephone number).

For each item ordered:

1. The product and any option.
2. The quantity required.
3. The price per unit.
4. Quotation number if relevant.

Prices

All prices shown in this catalogue are exclusive of VAT. Prices are subject to alteration without notice and goods will be invoiced at the prices prevailing at the time of despatch. This priced catalogue supersedes all previous price lists.

Product availability

Items shown **tint flashed** yellow are normally available on a reduced lead time. Details of lead times for all other items can be obtained from the Sales Office.

Delivery lead times

Delivery lead time indications are given subject to the availability of materials and production loadings. Whilst every effort will be made to achieve these dates, they may vary without notice.

Amendments and cancellations

Any order amendment or cancellation will not be accepted without prior written agreement, and a charge will be levied for any specific costs incurred.

Delivery

Premdor delivers across mainland UK on a published multi-drop schedule based on key order days for the delivery address postcode area. Please note that delivery dates may change and will vary around bank holidays. Details of the current delivery arrangements can be obtained from Premdor.

Please supply post code details when ordering to avoid unnecessary delay.

Deliveries made on our scheduled delivery service to distributors' yard are free of charge.

For site deliveries please contact the sales office for prices and terms and conditions.

After sales

Premdor prides itself in providing a complete after sales package. Our after sales service can be contacted through the Sales Office or email aftersales@premdor.com

Environmental chain of custody

Please note that where products are supplied with third party environmental accreditation, it is the purchaser's responsibility to ensure continuity of certification as required through the supply chain.

General information

Door thickness

Please note that Premdor door products are manufactured to the dimensional tolerance requirements of EN951 & EN952. These European standards allow a thickness, width and length tolerance of +/- 1.5mm for all interior and exterior doors.

Reproduction

Drawings and photographs are intended as being illustrative only and do not represent a product offering. Colours and photographs depicted are as accurate as photographic and printing processes can allow.

Illustrations

Products are shown glazed and fully finished for illustration purposes only. To confirm details for particular products please check within the relevant specification section.

Catalogue supplies

For merchant customers who wish to receive copies of our catalogues, please request with your order, or email ukcatalogues@premdor.com

Symbols

Symbols shown on each page are intended as a guide only. They refer to some but not necessarily all the products shown in the section.

Trade Descriptions Act 1968

In the interest of continuous product design and improvement, Premdor reserves the right to alter specifications and descriptions or withdraw products without prior notice.

The current specifications of any product are available on request and whilst every effort is made to produce up to date literature, this catalogue should only be regarded as a guide to current specifications.

It does not constitute an offer for the sale of any particular product.

Important information

Doors have a single lock block. The side of the door that the lock block is situated is indicated on the top of the door. On the veneered doors the lock block is positioned centrally. On moulded doors, the top of the lock block is 880mm from the top of the door. The lock block is 360mm long by 80mm deep (+/-15mm)

Standard Core

A multi-cell or spacer pad core for light duty, non fire rated applications.

Suitable for domestic use.

Specification for catalogue standard core interior and exterior door types.

Actual core construction may vary.

Semi Solid Core

Offering additional weight to the standard 35mm door, this specification is optional on moulded panel doors in styles and sizes shown in this Range Guide.

Actual core construction may vary.

Safe 'N' Sound

Solid core material in a standard thickness door, offering the best specification.

Actual core construction may vary.

Solid Core

A 35mm Solid core construction provides more than twice the weight of a standard core door providing a much sturdier feel.

Solid core provides the extra benefits of added strength, durability and flexibility.

Actual core construction may vary.

Moulded Fireshield FD30

A high density particle board surrounded by substantial framing.

When correctly installed with suitable intumescent strips as a doorset assembly the door will provide certified fire resistance.

This specification may be used on Fireshield and Firemaster doors at our option.

Actual core construction may vary.

PremCor FD30 / FD60

PremCor is a high density core material which requires no timber framing.

This proven construction, when correctly installed with suitable intumescent strips, will provide certified fire resistance.

This specification may be used on Fireshield and Firemaster doors at our option.

Actual core construction may vary.

Note: The minimum screw for fixing the hinge into the door is a 50mm x size 8 (4mm) fully threaded type screw.

Framed FD30

A high density fire door core surrounded by substantial framing.

When correctly installed with suitable intumescent strips as a doorset assembly the door will provide certified fire resistance.

This specification may be used on Fireshield and Firemaster doors at our option.

Actual core construction may vary.

Terms and conditions

1. GENERAL

(1) 'The Company' means Premdor Crosby Ltd and shall include any principal agent successor or assignee of the same and 'the Customer' means the person, firm or company to whom a quotation is addressed or whose order is accepted by the Company and 'the goods' means the product of the Supplier which is the subject of such quotation or order.

(2) All prices quoted by the Company are based upon these Conditions of Sale and reflect the limitations upon the Company's liability which they contain. Should any customer wish to contract with the Company otherwise than on the terms of such Conditions of Sale special arrangements can be made and a revised price quoted by the Company.

(3) In the absence of any such special arrangement (which shall not bind the Company unless made in writing and signed on the Company's behalf by a person duly authorised for that purpose) all quotations given and all contracts made by the Company and any additions or amendments thereto shall be subject to these Conditions of Sale which supersede and shall be taken to override any terms or conditions proposed or stipulated by the Customer.

(4) No agent or salesman of the Company has authority to give any guarantee or warranty on behalf of the Company or to transact business other than on the (unnamed) terms of these Conditions of Sale.

2. LIMITS OF CONTRACT

No binding contract is created until an order is accepted by the Company and all prior correspondence or oral communications are to be regarded as superseded and not forming part of the contract. Prices quoted are subject to revision for errors and omissions at any time.

3. AGENTS

The term 'agent' as applied to those persons firms or companies either in the United Kingdom or elsewhere with whom the Company has made arrangements for the sale of its goods is a nominal one, and indicates only that they are local representatives appointed for the convenience of customers and through whom enquiries or orders may be received and dealt with by the Company.

They are not authorised by the Company to incur any liability, give any guarantee or warranty, make any representations or transact any business whatsoever on behalf of the Company other than the offering for sale of the Company's goods upon the terms of these Conditions.

4. TECHNICAL DATA

All drawings, descriptive matter, price lists or advertisements, whether or not supplied with this quotation or tender are approximate only and intended merely to give a general idea of the goods described therein and shall not form part of the contract. The Company offers its designs for the Customer's approval. Unless supplied or approved by the Company it undertakes no responsibility for sites or foundations, or for any framework or support, or for compliance with any local bye-laws or statutory regulations, or for the fulfilment of any special requirements which the Customer may be bound to observe or fulfil. Copyright in any such items as are referred to shall remain with the Company.

5. TITLE

The implied undertakings as to title etc. set out in Section 12 of the Sale of Goods Act 1978 shall be express terms of the contract between the Company and the Customer.

6. PRICE

(1) Unless a quotation or tender has been submitted the price of the goods shall be the price ruling at the date of despatch notwithstanding any price specified in any order or order acceptance.

(2) If a quotation or tender has been submitted by the Company it will accept orders which are received within the time limit specified therein at the price stated in that quotation or tender.

(3) The price of the goods shall be subject to the addition of value added and other taxes and the cost of any special packing required by the Customer.

(4) Any increase in costs or expenses arising from any act or omission or any special requirements of the Customer or any modifications made at the Customer's request may, at the Company's option, be charged to the Customer.

(5) A delivery charge will be payable where the order value is less than the minimum order value required at time of ordering as stated in the Company's 'Delivery Charges' document, available on request. The Company shall determine the route and method of carriage and any special requirements of the Customer shall be subject to an additional charge.

7. VARIATIONS TO SPECIFICATIONS

The Company reserves the right to constantly review its products and to alter and improve the specifications or dimensions of the components or materials used to substitute other components or materials of similar strength, specification, dimensions or quality, either when the components or materials specified are not readily available or the Company considers that the substituted components or materials are a reasonable alternative or improvement to the components or materials specified.

8. DELIVERY

(1) Any time or date for the despatch or delivery for goods or for the completion of work whether specified in the Company's quotation or otherwise given by the Company shall be taken as an estimate made by the Company in good faith but shall not be binding upon the Company either as a term of the contract or otherwise. In no circumstances shall the Company be liable for any loss or damage sustained by the Customer in consequence of failure to deliver within such time or by such date or in consequence of any other delay in delivery however caused.

(2) Unless otherwise agreed in writing delivery shall be made at the premises specified by the Customer or the Customer's carrier. Subject to Condition 8 (4) the risk in the goods shall pass to the Customer upon delivery. It is the Customer's responsibility to dispose of all packaging after delivery.

(3) The Company may deliver the goods in installments and separate contract upon the terms of these Conditions of Sale.

(4) If delivery of the goods is delayed through any act or omission of the Customer, the Company may put the goods into storage at the Customer's risk and expense.

(5) The customer undertakes to inspect the goods upon delivery and shall be deemed to have accepted the goods upon the earlier of payment in full for the goods or 5 days after the delivery has been made, if the Company has (i) not been notified of the Customer's refusal to accept the goods or (ii) pursuant to such a claim has not complied with condition 9 below.

9. LOSS OR DAMAGE IN TRANSIT

(1) Where the Customer wishes to adjust the invoiced value for goods delivered by the Company, in respect of a claim against the Company for (i) goods lost in transit or (ii) edge damage to goods in transit or (iii) any other damage to goods that is reasonably identifiable at the time of the delivery, then the Customer must provide details of the claim in writing on the face of the delivery note that accompanied the goods.

(2) Where the Customer's claim relates to (i) damage that cannot be reasonably identified at the point of delivery or (ii) the goods delivered are incorrect in that they vary in style or description from the Customer's order or the details contained in the delivery note, then the Customer must inform the Company in writing within 48 hours of the delivery being made.

(3) Any liability which the Company may incur for loss of or damage to the goods whilst in transit shall in no case exceed the invoice value of the goods and in no circumstances shall the Company be liable for any indirect or consequential loss however caused.

10. PAYMENT

(1) Unless otherwise agreed in writing, all accounts shall be paid net at the Company's registered office on or before the last day of the month following the date of the Company's invoice. Cheques and money orders shall be made payable to or to the order of the Company. Only the Company's official receipt will be treated as valid. Time shall be of the essence.

(2) The Company shall be entitled to charge interest on all overdue accounts at a rate of 2% per month above the base rate from time to time of National Westminster Bank plc on the outstanding balance.

11. PASSING OF PROPERTY

(1) The goods shall remain the sole and absolute property of the Company until such time as the Customer shall have paid to the Company the agreed price together with the full price of any other goods the subject of any other contract with the Company provided that the Company at its sole discretion may upon expiry of the six month period from the date of the Company's invoice release its title to the goods the subject of the invoice without notice to the Customer.

(2) The Customer acknowledges that the Customer is in possession of goods solely as bailee for the Company until such time as the full price thereof is paid to the Company together with the full price of any other goods the subject of any other contract with the Company.

(3) Until such a time as the Customer becomes the owner of the goods, the Customer will store them on his premises separately from the Customer's own goods or those of any other person and in a manner which makes them readily identifiable as the goods of the Company.

(4) The Customer's right to possession of the goods shall cease if he, not being a company, commits an available act of bankruptcy or if he, being a company, does anything or fails to do anything which would entitle a Receiver to take possession of any assets or which would enable any person to present a petition for winding-up. The Company may for the purpose of recovery of its goods enter upon any premises where they are stored or where they are reasonably thought to be stored and may repossess the same.

(5) Subject to the terms hereof the Customer is licensed by the Company to agree to sell the Company's goods, subject to the express condition that such an agreement to sell shall take place as agents and bailees for the Company whether the Customer sells on his own account or not and that the entire proceeds thereof are held in trust for the Company and are not mingled with other monies and shall be at all times identifiable as the Company's monies.

(6) If the Customer has not received the proceeds of any such sale, he will upon being called upon so to do by the Company, within seven days thereof assign to the Company all rights against the person or persons to whom the Customer has supplied the goods.

12. SUSPENSION OR CANCELLATION OF DELIVERIES

(1) If the Customer shall fail to pay to the Company on the due date any sum payable hereunder, or shall have a receiving order in bankruptcy made against him, or make any arrangement with his creditors, or being a body corporate shall have a receiver appointed or if any order shall be made or any resolution passed for winding up the same, the Company may, without prejudice to its other rights, demand immediate payment by the Customer of all unpaid accounts and suspend further deliveries and cancel this and any other contract between the Company and the Customer without any liability attaching to the Company in respect of such suspension or cancellation and debit the Customer with any loss sustained thereby.

(2) If the Customer cancels his order the Company shall be entitled to recover any loss sustained thereby from him.

13. RETURNS

The Company's policy on returns is covered in the 'Product Returns Procedure' document, available on request, which should be considered part of these Terms and Conditions.

14. GUARANTEE

(1) The Company undertakes to repair or replace, at the option of the Company, any goods manufactured by the Company which are shown to be defective in materials or workmanship within the warranty period for the applicable goods as defined in this range guide or on your sales order from the date of delivery. Provided that the Company shall be under no liability under the said guarantee if (a) the Customer has not paid in full for the goods or (b) the Customer has executed or attempted to execute repairs or alterations to the goods which are not authorised by the Company or has failed in any other respect to store the goods correctly or has mishandled the goods or failed to adhere strictly to the terms of hereof or (c) the Company has not been notified of any defect within one month of the defect becoming apparent.

(2) Any claim against the Company under Condition 14 must be made in writing to the Company on a 'Customer Care Application Form' which forms part of the Company's Quality procedures and will be made available by the Company in a timely manner.

(3) Should a Customer claim, made against the company under the terms of the Guarantee, be rejected by the Company, then the Customer reserves the right to levy an administration fee, equal to the costs incurred by the Company during the processing of the Claim or £100, whichever is the higher value. The Customer must pay the administration fee within 30 days of the Customer being notified by the Company that the claim has been rejected.

15. EXCLUSION OF LIABILITY

(1) The Company's guarantee is provided by the Company and accepted by the Customer in substitution for all express or implied representations conditions and warranties statutory or otherwise as to (a) the stated quality satisfactory nature fitness for purpose durability or performance of the goods and (b) the standard of the Company's workmanship and the stated quality satisfactory nature fitness durability or performance of any materials used in connection therewith and all such representations conditions and warranties are hereby expressly excluded.

(2) Except for any liability which it may incur for death or personal injury resulting from negligence the Company shall not be liable in any manner whatsoever whether in contract, in tort, in misrepresentation or otherwise for any consequential or other loss damage or injury however caused which may arise out of or in connection with the supply of goods to or the execution of any work for the Customer (including goods supplied and work executed under the said guarantee).

16. LIEN

The Company shall have a general lien in respect of all sums due from the Customer upon all goods to be supplied to such Customer or upon which work has been done on the Customer's behalf and, upon 14 days written notice to the Customer, may sell such goods and apply the proceeds towards the satisfaction of the sums due to the Company.

17. FORCE MAJEURE

If the performance of the contract by the Company shall be delayed by any circumstances or conditions beyond the control of the Company the Company shall have the right at its option (a) to suspend further performance of the contract until such time as the cause of the delay shall no longer be present or (b) to be discharged from further performance of and liability under the contract and if the Company exercises such right the Customer shall thereupon pay the contract price less a reasonable allowance for what has not been performed by the Company and the Company shall not be liable for any loss other than the price already paid for any goods not supplied less the Company's expenses.

18. SEVERANCE

If any condition herein shall be deemed void for any reason whatsoever, but would be valid if part of the wording thereof were deleted any such condition shall apply with such modifications as may be necessary to make it valid and effective.

19. 'DEALS AS CONSUMER'

Nothing in these Conditions shall affect the statutory rights of a customer who in relation to the Company 'deals as consumer' as defined in Section 12 of the Unfair Contract Terms Act 1977 or any amendment or modification thereof.

20. LEGAL CONSTRUCTION

This contract shall be constructed in accordance with English Law and shall be subject to the jurisdiction of the English Courts.

21. EXPORT TERMS

(1) Where the goods are supplied for export from the United Kingdom, the provisions of this clause shall apply subject to any special terms agreed in writing between the Customer and the Company.

(2) The Customer shall be responsible for complying with any legislation or regulations governing the importation and/or sale of the goods into or in the country of destination and for the payment of any associated duties or taxes.

(3) The Customer shall arrange for testing and inspection of the goods prior to collection/ delivery and the Company shall have no liability in respect of any defect in the goods which would have been apparent on inspection and which is claimed after delivery, or in respect of any damage during transit.

(4) Unless otherwise agreed in writing the goods shall be delivered ex-works and the Company shall not be obliged to give notice to the Customer that the goods have been so delivered.

Featured products

Introducing some of our favourite products and solutions.

portfolio

Need a consistent design feel? Portfolio doors are manufactured with co-ordinating lippings, solid in colour and designed to closely match the colour of the face veneer.

Doors are constructed using 35mm solid core (exc. Durador). 44mm doors are constructed using PremCor, a high density core which requires no timber framing.

Featured

Light Grey two stile

P50

Enhance your Portfolio selection by adding a glazed solution for those environments demanding more light or visibility.

Supplied with co-ordinating foil wrapped beading in a colour that closely matches the face veneer.
