The boiler range

for new build developers, from Vaillant.

Vaillant Home boiler range

The overview brochure

The Home boiler range...

featuring the highest ever

SAP performance for combi boilers

Vaillant has developed a range of ErP 'A' Rated boilers, specifically created for the new build market.

The Home boiler range provides the highest ever SAP efficiency levels: significantly exceeding building regulations and offering opportunities to lower your overall build costs.

Home has been designed with simplicity in mind, making it easier for developers to comply with SAP, ensuring that you can hit your DER targets in the most cost-effective way possible.

At Vaillant, we offer our customers the unrivalled levels of service and support that you would expect from the world's largest heating manufacturer. Our service includes industry-leading homeowner and installer support, an excellent design service and multi-million pound R&D programmes, which ensure that our products and services continue to be the best.

Industry-leading SAP performance levels

Vaillant Home is recognised as the most efficient boiler range for new build developments, achieving up to 4% improvement* on DER.

Which of course, all goes towards helping your designers meet their SAP requirements with ease.

Add Vaillant controls: boost SAP efficiency

The Home boiler features a bright, LCD on-board display and is compatible with a choice of Vaillant controls from a simple analogue timer to the advanced vSMART™ app-based heating control. Home can also be installed with any currently specified third-party controls. Choosing Vaillant controls boosts SAP efficiency levels even further to reduce complexity and costs.

Options to suit any house type

Home's wide range of outputs, covering combi, system and regular options means that we have a solution to meet each and every house design and homeowner demand.

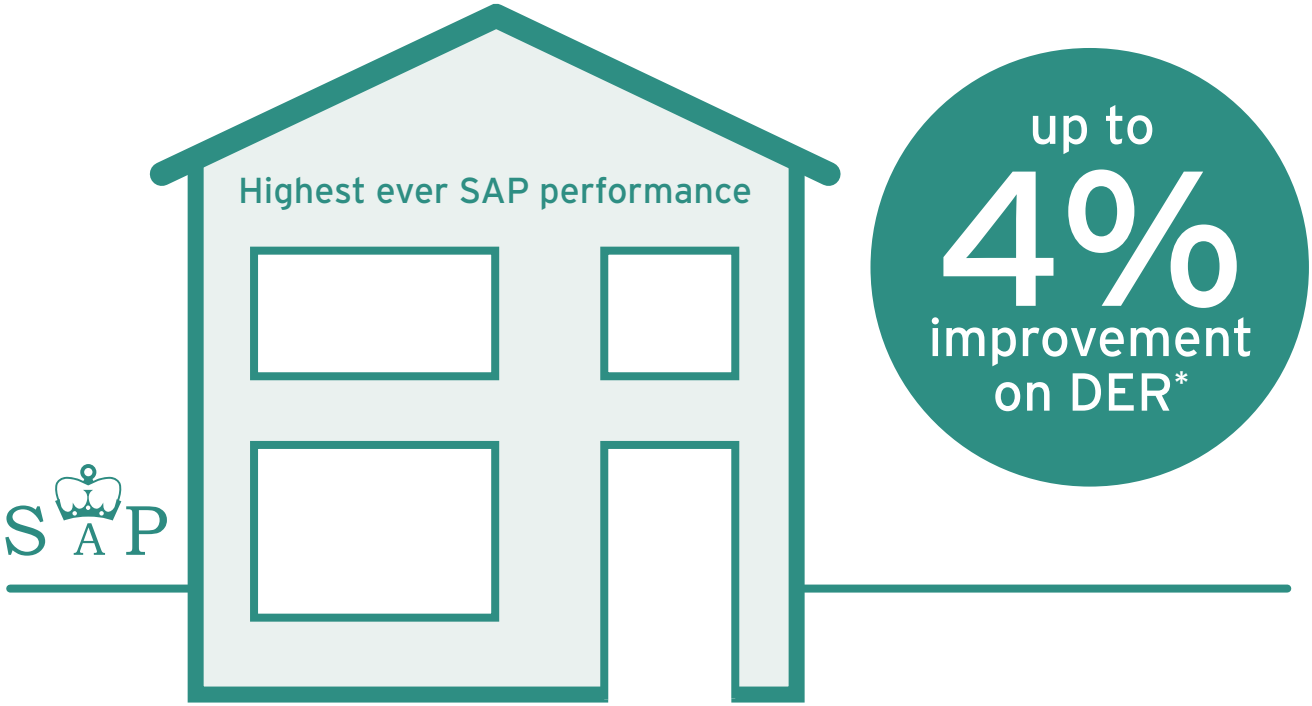

Expert service from initial specification to homeowner support

Vaillant offers developers a complete support package that is with you every step of the way. From early specification consultancy, followed by a comprehensive design service, full technical support and training for your installers, marketing support for the show home sales team and of course, homeowner support. With a UK call centre and over 230 fully trained service engineers, Vaillant offers unrivalled service levels to ensure your Home boiler is always performing at its peak.

A choice of guarantee

For extra peace of mind, your Vaillant Home boiler comes with a 2-year guarantee as standard - with options available for homeowners to purchase guarantee extensions up to 5 years. Homeowners can also choose from a variety of annual service packages, all carried out by our own skilled service engineers.

* Figures based on 3 bed detached house, 104m², 1 bath, 1 en-suite with a Home combi 30 installed

Don't take our word for it:
ask your SAP assessor to
check these figures.

SAP assessors can use the Product Characteristics
Database (PCDB) information within SAP calculation
software to review the industry-leading performance
of the Home range against your chosen house types.

Home combi can achieve up to 3.64% improvement on DER
compared to the previous best-in-class combi competitor.

Home combination boiler

The Home combi boiler comes with an impressive range of outputs. An attractive, contemporary design, bright easy to use interface and a choice of homeowner controls. The Home boiler range features the highest efficiency levels for the new build market, reducing the complexity of the initial build and offering homeowners an industry-leading heating performance which will help keep energy bills low.

Home is a light and easy to install boiler and is suitable for all house types. Using a standard DIN pipe layout makes boiler installations quick and easy and patented 4-sided cooling reduces the stress on the aluminium heat exchanger: meaning greater reliability and a lower cost of ownership. The Home boiler range is supported by a choice of guarantees for the new homeowner and Vaillant's UK-wide spare parts availability offers further peace of mind.

Home combination boilers

Product Features & Benefits

High Performance

- ErP A Rated (93%)
- High SAP efficiency of 89.3%
- SAP performance up to 3.64% higher than a typical competitor reference
- Modulation up to 1:5 for increased efficiency
- Fully modulating low NOx burner

Ease of Installation

- Compact case dimensions 740mm x 418mm x 300mm (system and combi)
- Two-way siphonic condensate trap for simplicity of commissioning
- Fully modulating high-efficiency Grundfos pump
- Fully compatible with a choice of Vaillant controls
- Low lift weight
- Fittings pack included

Quality and reliability

- High performance, long life aluminium alloy heat exchanger
- Production to ISO 9001
- 2-year guarantee for peace of mind, with the opportunity to extend to 5 years

Flexible siting

- Flue lengths up to 10m horizontal or vertical with standard 100mm flue
- Flue lengths up to 25m horizontal or vertical with optional 125mm flue
- Upward piping possible with optional spacer frame accessory
- No compartment ventilation needed
- Complete range to suit every UK house type

Home regular boiler

The Home regular boiler comes with an impressive range of outputs. An attractive, contemporary design, bright easy to use interface and a choice of homeowner controls. The Home boiler range features the highest efficiency levels for the new build market, reducing the complexity of the initial build and offering homeowners an industry-leading heating performance which will help keep energy bills low.

The Home regular boiler range is suitable for properties with high hot water demands and can be installed with your choice of Vaillant's range of cylinders for hot

water storage. Home is a light and easy to install boiler which benefits from being compact in size, making it suitable for cupboard-fit installations. The patented 4-sided cooling reduces stress on the aluminium heat exchanger, meaning longer-term reliability and a lower cost of ownership. The Home boiler range is supported by a choice of guarantees for the new homeowner and Vaillant's UK-wide spare parts availability offers further peace of mind.

A choice of intelligent controls

Central heating and domestic hot water controls are key to delivering greater efficiency, providing a comfortable living environment and help to minimise fuel costs.

Designed to work harmoniously with all Vaillant boilers, our controls deliver a greater level of connectivity, ensuring your boiler is working to its peak performance and always maintaining optimum efficiency.

Analogue timer

- Traditional interface for customers to set heating programmes directly at the boiler
- 24 hour central heating timer for use with Vaillant Home combination boilers
- Timer plugs straight into the boiler fascia

For more information about Vaillant's range of controllers please visit www.vaillant.co.uk/installers/products/domestic-boilers/controls-and-accessories

Choice of intelligent controls

VRT 350 wired or VRT 350f wireless load compensating programmable room thermostat

- Enhanced Load Compensating, adding 3% to the SAP efficiency rating
- ErP class 5 control delivering an additional 3% to the ErP rating
- Using our eBUS protocol, the VRT 350 control can fully modulate and adapt the heating appliance to efficiently meet the current room conditions
- Times can be set for each week, day or over a 24 hour period
- Delayed start function comes as standard for improved SAP performance
- Blue backlit display, using proven technology offers outstanding contrast, resulting in clear information, whilst providing a low energy consumption
- Appliance service, fault and maintenance indication is displayed on the screen
- Comes with a wealth of additional functions such as a heating boost, hot water boost, one day away from home mode, one day at home mode etc.
- Automatic adjustment for daylight saving times
- For complete flexibility where wiring is difficult, the wireless version a VRT 350f is available

VRC 470f Wireless weather compensating programmable room thermostat

- Enhanced Weather Compensating, adding 3% to the SAP efficiency rating
- ErP class 6 control delivering an additional 4% to the ErP rating
- Using our eBUS protocol, the VRC 470f control can fully modulate and adapt the heating appliance based on the outside temperature to efficiently meet the current room conditions
- Times can be set for each week, day or over a 24 hour period
- Blue backlit display, using proven technology offers outstanding contrast, resulting in clear information, whilst providing a low energy consumption
- Appliance service, fault and maintenance indication is displayed on the screen
- Comes with a wealth of additional functions such as a heating boost, hot water boost, one day away from home mode, one day at home mode etc.
- Automatic adjustment for daylight saving times

What is Vaillant vSMART™?

vSMART™ is a wireless heating and hot water control and smartphone app, giving homeowners the ability to take control of their heating from anywhere, at any time.

vSMART™ can be installed in as little as 25 minutes. Easy to fit connection from the gateway; wires are fed straight into the boiler, using our intelligent low voltage eBUS connection which requires easily available 0.75mm, 2 core cable.

The vSMART™ room thermostat can then either be wall mounted or free-standing, depending on the homeowners' preference.

vSMART™ App-based weather compensated control

- Easy to use app, for managing your heating and hot water
- Intuitive and simple interface – quick and effortless control of your heating and hot water system
- Electronic paper display – crystal clear display with low energy consumption
- Self-learning – vSMART™ automatically learns and adjusts to the thermal behaviour of your home
- Internet weather compensation – vSMART™ only uses your energy as and when it needs to without the need for an outside temperature sensor. This can result in an efficiency uplift of +3%
- eBUS communication – vSMART™ and Vaillant boilers work harmoniously together
- One heating circuit and DHW management – DHW and central heating control from one device
- Multi-user sharing and multi-home control – you and your family can manage several heating systems for the same or different locations
- Compatible with the entire range of Vaillant System, Regular and Combination boilers
- Energy history – vSMART™ displays your home's temperature & boiler operating times
- Preconfigured profiles – vSMART™ comes with preconfigured profiles for away, night & at home for you and your family's convenience

Self-learning control

vSMART™ learns from its environment. It uses the weather information from the internet and also all the data that has been previously recorded to understand the thermal behaviour of the house. Two weeks after the commissioning and thanks to eBUS communication, vSMART™ is able to tell the boiler when and at which temperature to start at in order to reach the right set-point at the right time.

Nationwide After-sales Service

Here at Vaillant, we invest as much time, energy and effort into getting outstanding service as we do in creating industry-leading heating solutions. So you know when you choose us you will be supported by the best.

Online ErP Labelling Tools

All Vaillant Home boilers are compliant with the European regulation: Energy related Products (ErP). A product label will be supplied with the boiler.

If you need to create a label for a heating system, Vaillant's Online ErP Labelling Calculator is an easy to use tool that has been developed to make it even easier to comply with the regulation.

Legislation

ErP: Energy savings with a future

The ErP (Energy related Product) regulations were introduced in the summer of 2015, meaning that all heating and hot water products must meet certain levels of efficiency specified by the EU, in line with the European emission and carbon reduction targets we have pledged to meet by 2020.

All Vaillant boilers have been manufactured to the highest of standards and now feature an upgraded high efficiency pump.

A new energy label is also being introduced in the EU to accompany the ErP regulation. Using a scale of A++ to G, the label will also contain information on other factors such as the appliance's heating performance and noise levels.

Training Enquiries

For information on training courses and centres in your area:

Telephone: 0845 601 8885

Email: training@vaillant.co.uk

After-sales

For support after your boiler has been installed, whether you would like to book a service or are in need of technical advice, our operators are available 7 days a week, 364 days a year.

Telephone: 0330 100 3143

Sales Enquiries

For installers wishing to purchase Vaillant products, this is possible either over the counter or as a next day service at most plumbing and heating merchants in the UK.

To find contact details for your nearest Vaillant sales representative:
